

Zero Waste

[Home](#) > [Manage Your Resources](#) > [Resource Management Solutions](#) > [Zero Waste](#)

Our Zero Waste services help organizations reduce landfill disposal through operational improvements, behavior change, and data-backed waste reduction strategies. We designed our programs to be scalable across portfolios and achievable within 6–12 months, with measurable outcomes.

Zero Waste Services

Waste Characterization Audits

We physically sort and measure landfill waste to identify diversion opportunities, contamination issues, and priority reduction materials.

Waste Reduction Roadmaps & Playbooks

ENGIE Impact offers goal-setting workshops and detailed roadmaps, complete with milestones, timelines, and a customized operational playbook showing how waste flows through the organization.

Program Implementation

We help establish waste stations, remove excess bins, and optimize container placement while right-sizing services, and deploying tailored signage and training (remote or in-person).

Validations

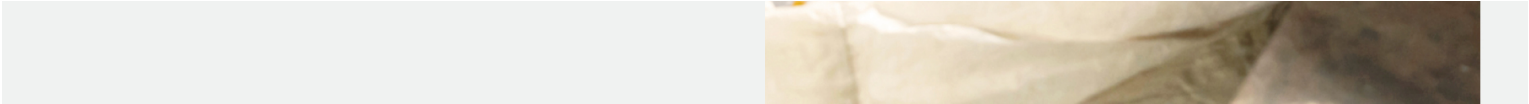

ENGIE Impact conducts follow-up audits 6–12 months after implementation. We measure progress, update diversion rates, identify drift, and validate sites achieving 90% diversion as Zero Waste facilities (remote or in-person).

Large-Scale Zero Waste Event Management

We conduct planning, on-site execution, and reporting for high-profile events. Our experience includes supporting NFL Super Bowl Zero Waste programs.

The ENGIE Impact Difference

Our Zero Waste approach is highly operational and site-focused. We help organizations reduce landfill disposal across large portfolios and focus on how waste is actually generated, handled, and managed on site. Our programs turn diversion goals into measurable, defensible results. From waste characterization to validation, we help organizations move beyond ambition and achieve lasting operational change.

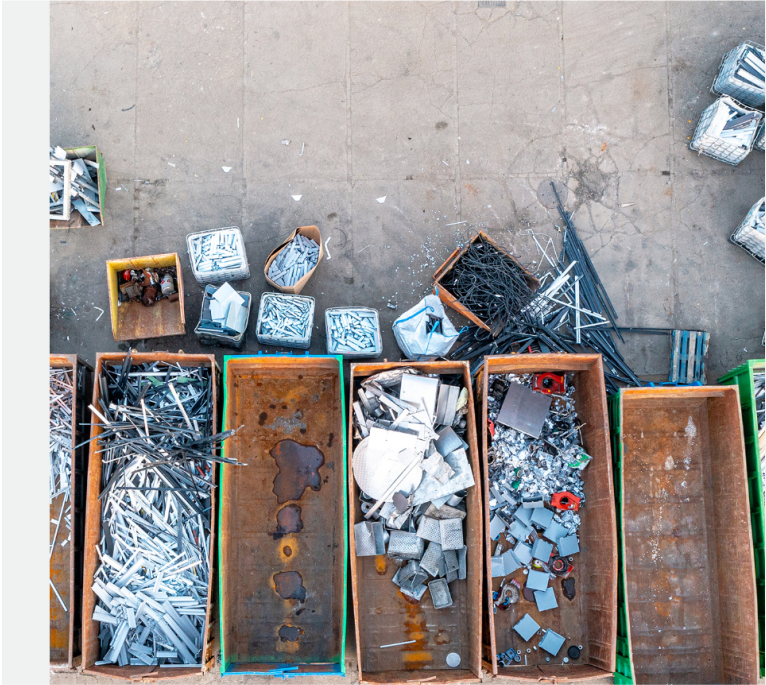

Why Partner With ENGIE Impact

Achieving zero waste requires operational expertise, credible data, and hands-on execution. ENGIE Impact manages complex, multisite portfolios, delivering end-to-end zero waste programs that are practical, verifiable, and tailored to your specific needs.

Since 2017, ENGIE Impact has:

- Conducted 2,650+ waste audits.
- Diverted 500 tons of trash.
- Deployed 443+ zero waste program sites.

ENGIE Impact has trained 50,000 client staff members across 500 sites through on-site and remote waste education, compliance training, and zero waste program support.
