

Building Performance Standards

[Home](#) > [Manage Your Resources](#) > [Resource Management Solutions](#) > [Building Performance Standards](#)

Building Performance Standards (BPS) compliance begins with data. By leveraging your utility data for ENERGY STAR® benchmarking and other reporting and compliance needs, you can simplify your **Utility Expense Management** and build a roadmap to more efficient buildings through BPS audits.

BPS is more than simply complying with regulations and avoiding fines—it's a long-term path to more efficient operations, improved building value, and maximized energy performance. By optimizing your facilities to improve efficiency, you can save on energy costs while reducing your carbon footprint.

ENGIE Impact's Expert Performance Standards Strategies

By partnering with your internal stakeholders to conduct site-level audits where needed, we deliver detailed compliance assessments and create actionable roadmaps to guide your path to BPS compliance. Our powerhouse team of Certified Energy Managers developed a proprietary process from their world-class expertise.

From Utility Data to Actionable Compliance Plans

Expense & Data Management Services

- Simplify **Expense & Data Management**. We handle invoice retrieval, data capture, bill audits, consolidation, and payments so you can reap the rewards of streamlined utility bill management.

Benchmarking Compliance Services

- **Leverage your utility data for ENERGY STAR® benchmarking.** With direct access to your energy and water usage data from utility bills, we seamlessly manage monthly uploads into ENERGY STAR® Portfolio Manager to support your benchmarking efforts.
- **Power reporting and compliance through ENERGY STAR® benchmarking.** By managing your ENERGY STAR® benchmarking, we're able to complete data verification and ensure timely submission of benchmarking compliance reports to all required jurisdictions.

BPS Audit and Roadmap Services

- **Define your path to compliance through the BPS audit and roadmap.** We build on your benchmarking data by conducting site-level audits and providing an actionable roadmap so you understand what it will take to meet Building

Partnering with ENGIE Impact gives you access to:

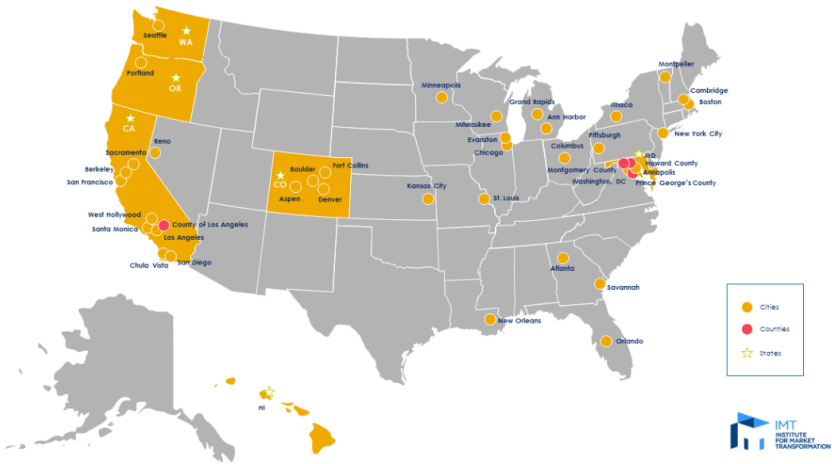

- Program kickoff and planning
- Pre-audit analysis
- Onsite energy audits
- Audit summaries and action plans
- Support for audit report submission

BPS Compliance Today, Efficient Buildings for the Future

As your partner in BPS compliance, we go granular: We help you with the data. As a 19-time ENERGY STAR® Partner of the Year, we have proven benchmarking and audit experience and provide scalable, on-the-ground support. Equipped with our deep regulatory knowledge and access to the best resources, you can have the tools your organization needs to turn BPS compliance into competitive advantage. ENGIE Impact is a proud partner of the [Institute for Market Transformation](#) (IMT).

Upcoming Energy Performance Requirements: CO, WA, and MD

Colorado, Maryland, and Washington have enacted statewide Building Performance Standards (BPS). Large buildings must meet strict EUI and GHG reduction targets by 2030 and beyond or face significant fines.

Building Performance Standards Offer Opportunity To Add Value

Building Performance Standards (BPS) are coming. ENGIE Impact's Craig Walter urges operators to assess energy use, plan capital, and upgrade now. Acting early provides incentives and better paybacks.

Building Performance Standards: What You Need to Know

Building Performance Standards are laws designed to reduce carbon emissions from existing buildings. Failure to meet these standards could mean significant financial setbacks.
