1. Email to Media Outlets (For interviews/features on Personal BusinessGPT)

Subject: Interview Opportunity: Privacy-First AI Chatbot Launch from BusinessGPT

Dear X,

I hope this finds you well. We'd like to introduce you to a groundbreaking innovation from BusinessGPT — *Personal Local AI Chat*, a privacy-first AI chatbot that runs entirely in your browser with **zero cloud connection and no data exposure**.

This free tool offers a completely local, offline AI experience that's already generating strong interest across sectors concerned with data security, productivity, and generative AI governance.

We believe this launch could be highly relevant to your readers/viewers given the growing concern around AI privacy and the future of secure productivity tools. We'd love to explore the possibility of:

- Featuring *Personal BusinessGPT* in your tech coverage,
- Arranging an interview with our CEO, **Yoav Crombie**, to discuss our vision for private, on-device AI,
- Or contributing expert insights around responsible AI adoption in regulated industries.

You can find more about the product here. A full press release is also available upon request.

Please let us know if you'd be open to coverage, collaboration, or interview interest, we'd be happy to accommodate timelines or additional information.

Warm regards,

2. Email to TikTok Tech Influencers (Request for collaboration + media kit)

Subject: Collaboration Invitation: The Future of Private AI - BusinessGPT

Hi X,

I hope you are well. We've been following your TikTok/YT and love the way you break down complex tech in a fun and approachable way, your content really stands out in the AI space.

I'm reaching out from BusinessGPT, a platform pioneering *privacy-first AI tools* for individuals and enterprises. We've just launched Personal Local AI Chat, a completely free browser-based chatbot that runs fully offline, no cloud, no tracking, no data collection.

We think your audience would love this.

We're looking to collaborate with creators who are passionate about tech, privacy, and real-world AI. If this sounds like something you'd be interested in, we'd love to discuss potential content partnerships with you.

Would you be open to sharing your media kit or rate card with us? We're flexible with formats and happy to work with what suits your style and audience.

You can check out the product here, and let us know if you'd like access to the beta or need any technical info.

Looking forward to hearing from you!

Best,
