

Portraits

Events

As a classically trained professional photographer with many years of experience, Nicole began her career working as a Fan Photographer for the prestigious Printroom company, where she covered The Globetrotters game. She is no stranger to events of all kinds ranging from unique weddings to corporate events. She uses a wide variety of equipment from flash bulbs, reflectors and lens filters to achieve fully lit, quality images. As a dedicated professional, she also retouches each individual image upon request.

Nicole Bermudez has a degree in both Photography and Graphic Design from Miami Dade College. Having expertise in digital photography, her major focus remains to be traditional photography and working with portraits in the darkroom. This in turn has paved her way for creating exquisite, detailed and crisp compositions. Her portfolio includes portraiture created for families, couples, children, actors, models and musicians.
