

The SuperGreen Solutions Advantage

At SuperGreen Solutions, we offer a variety of EV charging station installation, repair, and replacement services for those who have either invested in a personal electric vehicle or have implemented an EV fleet for their business.

This is an essential step toward achieving energy independence.

The Federal Government is offering an incredible tax credit to encourage the use of hybrid cars – 30% of the total cost, up to \$1,000. To qualify for this credit, you must purchase and install the station, keep all associated receipts, fill out form 8911, and include it in your tax return, and you will receive the credit from the IRS.

To schedule an EV Charging Station Install, scan the QR Code below, email or call:
