

Lee Physician Group: Specialty Care for Every Condition

“You need to see a specialist.”

That might sound scary at first—but part of serving the community is making sure the next step on your care journey inspires confidence. After all, our specialists have a razor-sharp focus. They’ve trained their whole lives for this.

Armed with that training as well as life-changing experiences at some of the top medical schools and hospitals in the country, Lee Health specialists dive into the details and take the reins after a primary care diagnosis.

Cardiology and Shipley Cardiothoracic Center

Heart disease continues to top lists of health concerns, so our cardiac experts push the envelope with revolutionary techniques – including non-invasive surgical options – that you can’t find anywhere else. We also have cardiology offices throughout Lee County that address heart failure, heart disease, rhythm issues such as A-fib and more.

Orthopedics

The LPG orthopedic team helps you age in a happy and healthy way. From diagnosis through recovery, LPG orthopedics makes sure your muscles, bones, and joints keep up with your active lifestyle.

Outpatient Imaging

Convenient procedures at outpatient locations across Lee County. Services include open MRIs, digital imaging, interventional radiology, ultrasounds, and more.

Cancer Care

Patients living with cancer have complex needs that go beyond medical treatment. Our specialists at the Regional Cancer Center in Fort Myers as well as oncologists at physician offices and clinics go the extra mile to provide the latest treatment, whenever and however you need it.

Behavioral Health and Addiction Medicine

Stress, anxiety and depression take their toll, but you don’t have to go through it alone. Our outpatient office in South Fort Myers provides diagnosis and treatment including medication management and therapy. Our addiction medicine team at the same location helps with alcohol or drug dependency.

Rehabilitation

Physical, occupational, speech, and cardiac therapy at multiple locations no matter where you are on your path to recovery after illness or surgery.

Urology

Treatment and surgery for simple and complex issues such as general urology complaints as well as specialty care for prostate issues, infections, cancer, incontinence, and more.

So Much More

Endocrinology, rheumatology, gastroenterology, neurology, pulmonology, OB/GYN, geriatric and memory care, palliative care, pain medicine, infectious diseases, allergy and immunology – the truth is,

Lee Health has the resources, the expertise, and the technology to help you with all of your healthcare needs.
