Health and Mortality Analysis

Figure Description:

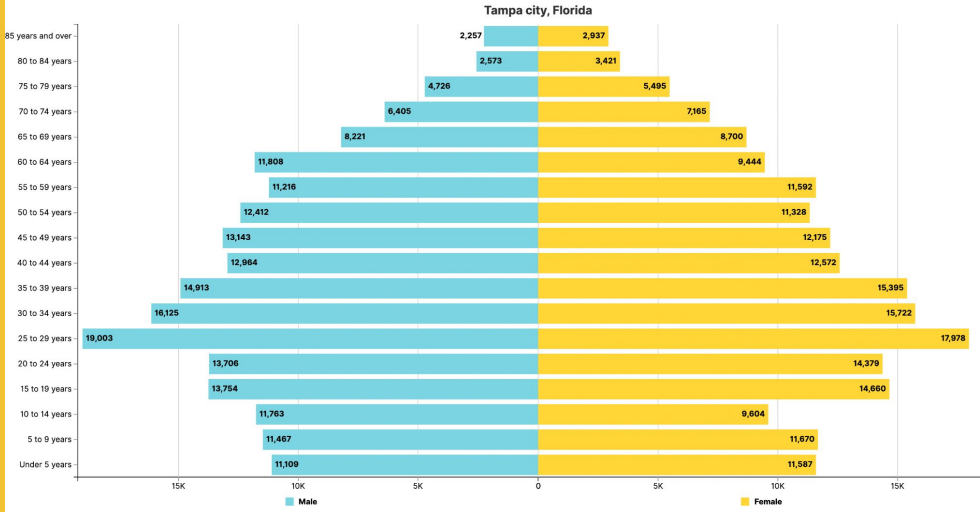

- This chart showcases the top ten reasons of death in hillsborough county, Florida, which encompasses Tampa.
- As shown, the top killers from most deaths to least are heart disease, cancer, unintentional injury, stroke, chronic lower respiratory disease, diabetes, alzheimers disease, septicemia, suicide, and chronic liver disease and cirrhosis.
- Tampa would be considered part of three of the epidemiological transition because most deaths are not due to epidemics and transmittable diseases, but rather chronic diseases such as heart disease, cancer, diabetes, alzheimer's, etc.
