

## LinkedIn Content — Community Partnership Announcement

We recently had the opportunity to attend the Youth Hockey Party hosted by the Utah Mammoth Amateur Hockey Association, an event centered around community, connection, and the growth of youth sports.

One of our brands, Superior Water & Air, is proud to support this program alongside partners like University of Utah Health, Nomi Health, and America First Credit Union.

Our team spent time connecting with families and sharing the importance of clean air and clean water in creating healthier homes, especially for growing families.

Supporting programs like this is a reflection of what matters to us: showing up for our communities, investing in youth, and contributing to experiences that bring people together.
