

Final Exercise for the course: "Taste of UX Writing" offered by UXHub

Original screen provided in the exercise.
Screen 5

My revised screen from the original.
Screen 6

Further improvements

- Delete the word "Menu" after "Settings" and the word "Options" after "Export"
- Instead of a Tooltip at each section, write main and subheaders at the very top, below the buttons and before the file type selection. The header and subhead should read as follows: MAIN HEADER; "Default export settings" SUBHEAD: "You can make changes before you export"
- Under each section (file type, size, location) should have an additional radio button that says "Do not make default"
- The blue button by "where to save file" should say "Export" The green button should say "Cancel."

UX Writer: Sandie Eggers Seagroves

Project: Final exercise from the UXHub course:
"Taste of UX Writing"

NOTE: *This project was completed using Miro.*
