

Bringing Items to Japan - Everything You Need to Know! (YouTube Shorts)

Let's address some common questions travelers have about packing for Japan.

I'm a photographer, can I come with a drone?

Probably the small-sized ones. Aside from general drone restrictions, bigger models may require special permissions to enter the country.

Can you bring deodorant?

Yes, but stick to unscented options to fit in with Japan's scentless culture.

What about Benadryl?

Totally fine as long as it's the US version without pseudoephedrine.

Can you bring Ritalin?

Yes, but with strict rules, a 30-day supply, a doctor's note, and under two grams in total weight.

And what about Adderall?

Nope, not allowed at all.
