3RD ANNUAL GOLF TOURNAMENT

UC RIVERSIDE SOFTBALL

Laura Fay pitched for UC Riverside from 1987 to 1990, compiling a 1.68 career ERA, but her accomplishments and love for UCR Softball stretch far beyond the pitching circle.

Now living in Silicon Valley with her husband and three children, Fay's success as the Vice President of Marketing at NVIDIA is a result of an education and an experience only UC Riverside could have provided her.

"UC Riverside gave me a fantastic education. I love that school. It was the right school for me at the time. I still keep in touch with so many friends and teammates from UC Riverside. The people, the friendships and the experiences that we all had shaped me and enabled me to step into my next chapter of the world."

Laura has been instrumental in the tremendous growth of Highlander Softball, but her generosity towards the program began as a student.

Today, she helps coach 12U and 14U travel softball teams. When a recreation league near her was on the brink of falling apart, Laura was there to step in. She started a non-profit 501c3 class A youth softball program, aimed at teaching girls the same values and ethics she was taught while playing at UC Riverside.

"To see the program thriving today is why I continue to want to invest in the program," Fay says. "I first wanted to do so as a student-athlete, but now I invest in whatever way I can to keep it alive because it's that important to me."

UC RIVERSIDE GAVE ME A
FANTASTIC EDUCATION.
I LOVE
THAT SCHOOL.

MEET FORMER UCR PITCHER LAURA FAY!

What are your favorite memories from UCR Softball?

Some of my best moments weren't on the field! They were on road trips with my teammates and learning things about each other that we wouldn't have learned just by practicing together. It was taking that kind of relationship and friendship that you've established and being able to have a different relationship than when you're back on the field.

How did being a student-athlete at UC Riverside prepare you for life after softball?

It taught me the basics, but they're super important. Certainly today as a mother of three, an executive at a demanding high-tech company and being a wife, it taught me one of the best lessons, which is how to prioritize and make sure I'm focused on the things that are most important in the moment.
