Details of the latest product

BOULDER, Colo. (October 2, 2025)— Tech Innovations Inc. announced today they will be releasing the newest and groundbreaking product called the TechMagic SmartGlove. The SmartGlove is a wearable device that allows users to integrate with their home device meaning they can control their home environment using hand gestures.

With this revolutionary device, users can turn on lights, adjust thermostats, play music and more all with a flick of the wrist.

The product will only be available at Best Buy starting at \$350 on Tuesday Oct. 14. The kit comes only available in the colors of pink and black. In addition, cleaning towels will be provided with every SmartGlove purchase.

“They said it couldn’t be done, but we did it! Say goodbye to all your remotes and hello to the smart glove,” said Louie Williams, founder and CEO of Tech Innovations Inc.

Founded in 2016, Tech Innovations Inc. is always thinking of its users when it comes to building new products and everyday functionality. The new SmartGlove provides just that, making life in the home easier with no remotes or apps required.
