

Disease Awareness Video

Title: Let's break the silence – Alzheimer's Awareness Video

Audience: Patients, caregivers, healthcare professionals, general public,

Reference: LinkedIn Publication

This short video, created for National Alzheimer's Awareness Month, raises awareness of the impact of Alzheimer's disease. I developed the concept, wrote the script, recorded the narration, and combined visuals, text, and music to evoke empathy and emphasize the importance of patient and caregiver support, as well as innovation in Alzheimer's care. The piece demonstrates my ability to deliver empathetic storytelling, accessible communication, voice-over, and audio and video editing skills. To ensure accessibility and reach, I produced three captioned versions in English, German, and Spanish.
