Sneak Peek at Hands-on Workshops

[View this email in your browser](#)

Hello!

Have you heard? Newsweek magazine has published their annual list of America's Best Cancer Hospitals 2023. Did you know that EVERY one of the Top 10 hospitals uses Orfit products in their care? Plus, many more in the Top 25 are Orfit users, too. We're proud that so many of these hospitals have chosen Orfit products as part of their state-of-the-art treatment programs.

This summer has been the hottest ever, but that hasn't slowed us down! The Orfit team and I have been racking up the miles on a whirlwind tour of PTCOG, the American Brachytherapy Society's annual meeting, DEGRO, and AAPM. It's always great to see you and we enjoy hearing about your challenges and successes. We take your feedback to heart, especially in our new product development.

We haven't put our luggage away quite yet! We'll be heading to San Diego for ASTRO and the ASRT Radiation Therapy Conference the first few days of October, and we'll be showcasing an exciting new product—more on that to come! So make sure to stop by our booths and see what's new.

You'll find a sneak peek below about our hands-on workshops at ASRT on Tuesday, Oct. 3. These hands-on experiences are great ways to experience Orfit products and learn tips and tricks for improved immobilization techniques for various types of radiation therapy.

I hope to see you in San Diego. Of course, if you have any questions about Orfit products, I'm here to help you anytime. Simply respond to this email. I can help you choose the Orfit system that's right for your facility and, if you'd like to try one of our systems, just let me know. I'll send out one of our product specialists to give you a hands-on trial.

Best,
Michael Pittman
Vice President of Sales, Orfit

America's Best Cancer Hospitals are using Orfit

Newsweek magazine just published their list of America's Best Cancer Hospitals for 2023 and we're proud to say that EVERY hospital in the top 10—and many others in the top 25—use Orfit products in their state-of-the-art treatment programs. Congratulations to all these hospitals who are leading the way in cancer care.

ASRT Workshop #1: Improving Reproducibility in Extremities Immobilization

If you're attending ASRT, you don't want to miss our hands-on positioning workshop, featuring our Orfit Extremities Solution. You'll learn multiple ways to use this versatile immobilization device to ensure more effective radiation treatments while streamlining your workflow. More details will be announced in the coming weeks.

Save the date for Tuesday, October 3!

ASRT Workshop #2: Head-and-Neck Patient Immobilization for SRS

Our second ASRT hands-on positioning workshop focuses on stereotactic radiosurgery (SRS), a highly precise form of radiation therapy that uses higher doses and fewer fractions— thus requiring an increased level of immobilization. See how our Orfit Thermofit, along with our Nanor® masks and BiteFix solutions, make it easy to keep patients immobilized—more comfortably—with greater precision and daily reproducibility for easy patient setup. More details will be announced in the coming weeks.

Save the date for Tuesday, October 3!
