Whether you're replacing a worn-out battery or upgrading for longer ride times, GoBike stocks electric bike batteries specifically built for each bike in the range.

The official 5Ah battery provides dependable 36V power for the GoBike 12 and 16. For the GoBike 20, the high-capacity 10Ah battery keeps young riders out on the track longer, helping them build confidence faster.

The GoBike 24 Pro uses a powerful 48V 15Ah battery to work seamlessly with its 2500W motor for serious off-road performance.

We also stock compatible chargers, controllers and throttles, making it simple to find the right electric bike battery replacement. All eligible batteries are backed by a 1-year warranty and local support.

Why Choose an Electric Bike Battery Replacement From GoBike

A genuine GoBike battery is built for performance and reliability. With proper care, batteries typically deliver 500–1,000 charge cycles or 3–5 years of use. Every eligible battery is backed by a 1-year warranty and local support..

FAQ

How long does an electric bike battery last on a kids' ebike?

Typically 3–5 years or 500–1,000 charge cycles with proper care.

How do I know when my electric bike battery needs replacing?

Reduced ride time or difficulty holding charge usually indicates replacement is needed.

How do I safely charge and store a lithium-ion electric bike battery?

Use the recommended charger and store the battery in a cool, dry place away from extreme temperatures.

Electric Bike Tyres

The right electric bike tyre can make your rides smoother, safer, and more fun. Whether your child is hitting dirt tracks, local parks or backyard trails, GoBike stocks replacement tyres that are built to keep them riding with confidence. Not sure which size you need?
