Whether you're a car aficionado who drives only the best or someone who simply enjoys fine things, you feel a ripple of excitement at the sight of a luxury car. The sleek beauty of luxury models is undeniable, but most prestigious brands offer more than a pretty exterior. Equipped with state-of-the-art engineering and technology, these four dream cars offer an unparalleled driving experience that you could never forget.

1. Bugatti Chiron

Sometimes speed and handling are the most luxurious aspects of a vehicle. One of the fastest vehicles on the road, this hypercar supplants its predecessor, the Veyron. With a formidable 1500 hp, it reaches 62 mph in less than 2.5 seconds and has a top speed of 260 mph. Exceptionally engineered, this machine's cabin boasts aluminum, leather, and carbon fiber throughout, along with a sound system that includes one-carat diamond membrane speakers. Priced at around \$2.6 million, this two-seat super-coupe stretches the limits of elegant living.

2. Aston Martin One-77

Only 77 of these rare beauties were made from 2009 to 2012, making ownership of this 750-hp supercar very rare. Equipped with a powerful engine, the vehicle clocks a top speed of 220 mph. It sports a full carbon fiber monocoque chassis and a handcrafted aluminum body. The sleek interior matches the lustrous exterior in complementary touches and hand-stitched materials, including exquisite leather. A drive in this exotic roadster could unleash your inner James Bond or Miss Money Penny.

3. Rolls-Royce Phantom Serenity

This one-of-a-kind automobile offers a more leisurely driving experience than a supercar, but it's no less indulgent. The bespoke sedan raises luxury to another level with hand-painted 12-layer silk that features a design inspired by the highly intricate detailing on a Japanese courtier's robe.

The car's handling matches the luxury of the interior. The 453-hp engine accelerates from 0 to 60 mph in less than 6.0 seconds, and the ride is as smooth as the cabin. Created to illustrate the company's commitment to customization, this dream vehicle can set you back as much as \$1 million.

4. Holland & Holland Range Rover

Long known for its luxury, Land Rover created its most lavish vehicle to date as a limited edition designed for European royalty. In partnership with British gunmaker Holland & Holland, the company added details that aren't available on any other vehicle, including engraved door handles that are similar to Holland & Holland gunstocks, and tan and espresso leather seats. Walnut veneers add to the elegance.

The high-end bespoke SUV is also an extreme performance vehicle with a 254-hp turbodiesel engine that reaches 60 mph in 7.3 seconds. In 2016, Land Rover shipped 30 of these rare vehicles to the U.S., with price tags of almost \$250,000 each.

These four luxury vehicles will make any car lover drool. Tell us more about your dream car over on our [Facebook](#) page.
