Category	Present	Future	Comments
Hitting Ability *	35	50	Hits from both sides of the plate, moves quite a bit in his stance for rhythm and is direct to the ball. Historically low K rates
Plate Discipline	35	40	Has a history of chase, doesn't make the best swing decisions. Doesn't walk much - BB% hovers around 6
Power Frequency *	30	45	Makes enough contact to get to in-game power but tends to manifest in doubles and triples more than over-the-fence power
Raw Power	50	55	Didn't see BP but judging off history of ISO, SLG, 90% EVs and projection to add strength
Running Speed *	50	50	4.2 down the line from the left side, quick out of the box, athletic gait
Base Running	50	50	Has the ability to swipe 15-20 bags now, with added strength speed may depreciate but he won't clog the bases
Arm Strength *	50	50	Average looking arm in my look, his best throws have carry
Arm Accuracy	50	50	Throws are accurate and on-line
Fielding *	40	45	Still learning, hands and feet work well but actions and first step could use some fine-tuning
Range	45	50	Range is functional at short
Baseball Instincts	40	45	Instincts are there and he is a twitchy athlete. Needs more quality reps
Aggressiveness	50	50	Moves quickly out of the box. Aggressive in his approach and will swipe double digit bags. Gamer

Summation: Look at future everyday shortstop with feel to hit. History of touching the ball at each level and hitting for average. He's shown he can catch up to velocity, even in two-strike counts, and has a consistently low K rate. IZ s/m a bit high on spin only. History of chase and BB% hovers around 6%. Profile is hit over power, however, he is only 20 and the body is projectable - power can increase as he adds muscle. Hands and feet will help him to stick at short, room for improvement with first step actions. Instincts are there. Grinds and competes
