Fastball Quality

Pres: 45

Future: 50

Comments: Can ride it or sink it, best ones have ride and get chase, s/m up top. The ones he sinks have visible arm side run.

Curveball

Pres: 55

Future: 60

CZ: 75

Comments: 12-6 curve with feel to spin, big depth. Throws for strikes and gets s/m.

Changeup

Pres: 45

Future: 50

CZ: 84

Comments: Flashes occasionally, looks like he's still getting a feel for it. Occasional s/m. Can land in zone, best ones have sink and fade.

Control

Pres: 45

Future: 50

Comments: Strike thrower, in the zone most of the time.

Command

Pres: 40

Future: 50

Comments: Moves his pitches around the zone well, knows how to get outs.

Arm Action

Comments: Longer, loose arm action into higher 3/4 arm slot. Slight hook out front.

Delivery

Comments: FWU, High leg kick, Front foot on-line upon delivery. Small gloveside falloff. Delivery is fluid, easy, repeatable.

Summary: Long Beach state commit, RHS with easy repeatable delivery. Fastball gets tons of s/m, great ride at top of zone to get hitters underneath. Can sink it as well. Curve is 12/6 shape, throws for strikes, great depth, gets s/m. Flashes change occasionally. Looks like he's had a slight uptick in fb velocity since my look. Had surgery already and body wise not much projection left.
