

KEY BENEFITS OF WHOLE LEAF ALOE VERA LINNE GEL

ALOE VERA

PROMOTES HEALTHY DIGESTION

Provides natural plant enzymes
that break down food

– Enzymes include amylase (starch);
cellulose (cellulose); lipase
(water insoluble lipids); and
alkaline phosphatase (proteins).

BENEFICIAL HEALTH AGENTS

The aloe plant produces
at least 23 proteins (polypeptides)
and at least four mannan sugars,
which promote the normal
regulation of cell growth and
support the immune system.

POLYSACCHARIDES & TRACE MINERALS

Aloe vera is rich in
polysaccharides and a
source of trace minerals.
Minerals are important for the
proper functioning of various
enzyme systems in metabolic
pathways and some minerals
act as antioxidants.

– Iron, copper, calcium, zinc, chromium,
manganese, potassium, sodium
and magnesium.

WHY ULTIMATE ALOE™ POWDER?

- Made from 100% aloe vera using only certified leaves
- Harvested and processed according to sanitary manufacturing practices that use specific time and temperature guidelines, preserving the natural properties of the aloe plant for maximum health benefits
- Ultimate Aloe Powder retains the qualities of naturally occurring aloe vera through a proprietary extraction process called ActivAloe®, isolating and concentrating the most active polysaccharides while removing undesirable components such as aloin and emodin that may cause digestive upset.
