Spread a little magic and give your home a spooktacular makeover this Halloween

There are so many eerie accessories both online and on the high street right now, from unearthly ornaments to sinister serving dishes. And one of this year's top trends is jewel-toned velvet, bringing a luxe feel to your spooky set-up. But there's still a place for traditional Halloween colours too – pumpkin orange will always be a classic – so have fun filling your home with ghoulish gear.
