Bubble Diagrams

Single pod

Outdoor Area

I placed the service pod near the entrance of the site for easier access. New guests can easily find their way to it and sign in. The paths lead to all the different pods, and there is an open stage area in the center for any community events.

The color palettes for my accommodation pods are calming green, which follows my mood board and helps to build towards the atmosphere in the site. The floorplan and layout for each accommodation pod is simple but contains all the main rooms and needs of the guests, giving it a minimal and simplistic feel.
