Conclusion

Throughout his time at Roma, Soulé has entered a very different environment from his time at Frosinone. He's no longer the sole creative outlet in a survival-side, but part of a squad with higher expectations, stronger structure, and more competition for minutes. He is learning to operate within a team that prioritizes structure, spacing, and collective rhythm, while still trying to assert the individuality that makes him dangerous. His minutes have been more situational, and that shift has clarified both his upside and the gap that remains between being a specialist weapon and a dependable, week-to-week starter at top-club level.

What remains clear with Matías is that his ability to destabilize low/defensive blocks is rare. He continues to be most dangerous when isolated on the right, facing defenders 1v1 and driving inside onto his left foot. Few wide players in his age bracket manipulate defenders with the same rhythm and composure. Even in reduced minutes, he shows an instinct for high-value actions—shots from central lanes, cut-backs from the half-space, and disguised passes after drawing pressure. He doesn't need volume to influence the match; his profile is built around creating moments that shift the game-state.

The challenge now is turning that talent into reliability within a higher-functioning team. Off-ball engagement, defensive continuity, and speed of decision in transition remain the swing factors. At Roma, these details matter more than they did at Frosinone, where his freedom was most likely prioritized over structure. Physically, he is still adjusting to defenders who close space faster and impose themselves earlier.

His next step should be defined by role clarity. Whether this is at Roma or at a new club, Soulé needs a season where he is trusted as a primary wide attacker in a competitive side, not just an impact option. Another year oscillating between roles risks stalling the rhythm that made him so dangerous. With consistent minutes in a tactically demanding environment, he projects as a high-level inverted winger capable of deciding matches at the top end of the game. He already has the tools his task now is converting those flashes of brilliance into consistent and sustainable output.
