

## Home page ( WIP update)

Updated the fonts as previous fonts are not suitable to be seen.

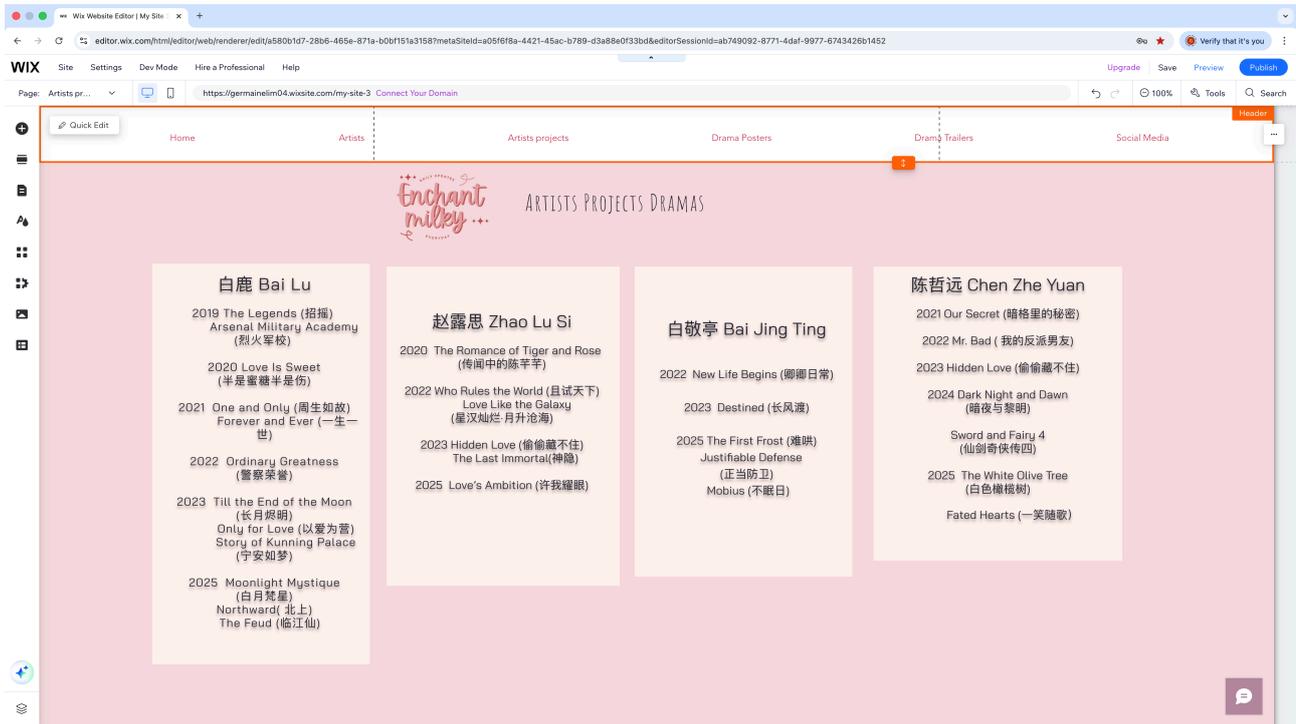

## Artists page (WIP Update)

This is the page for artist and their details such as name and birthdays, social medias Instagram, Weibo , Douyin etc

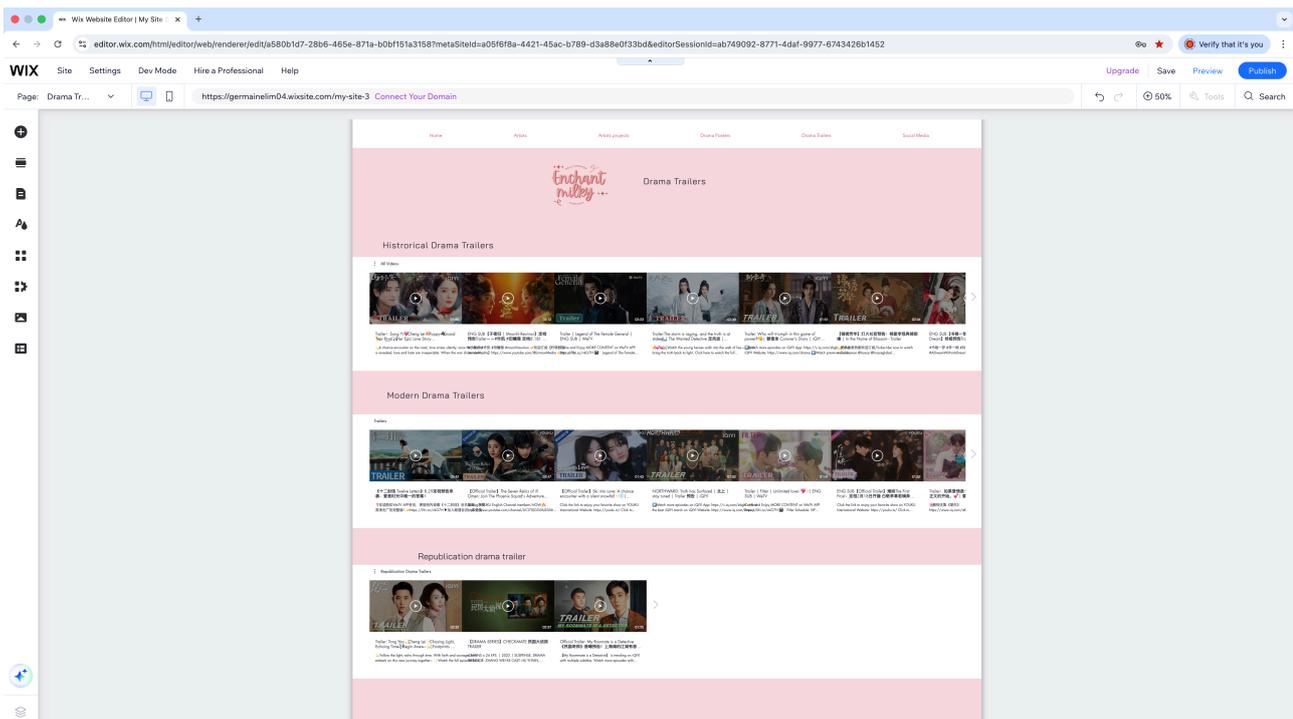

## Artists Projects page (WIP update)

This page is for artists projects, I have updated the fonts and some adjustments such as putting a background behind so it can be readable and seen clearly.

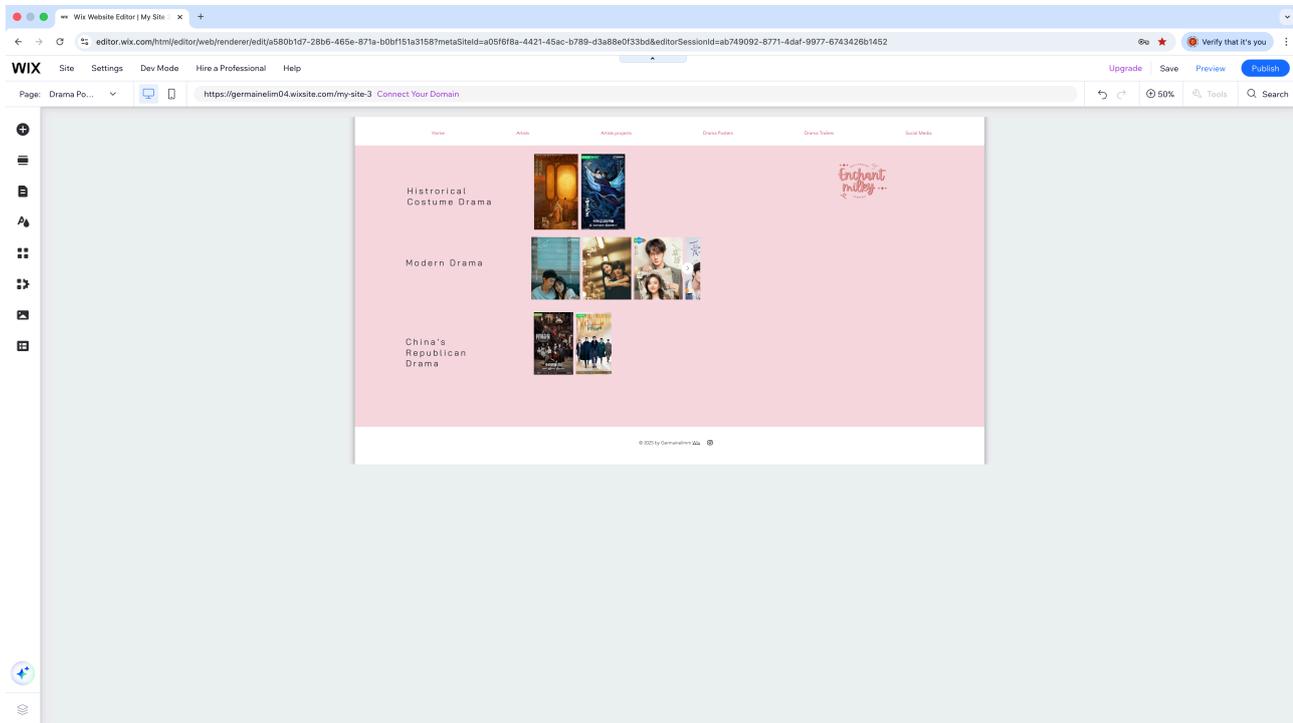

## Drama Trailers Page ( WIP)

This Page is for Dramas Trailers for different sections such as Modern, Historical , Detective/Crime With a update of some trailers being put in for different category.

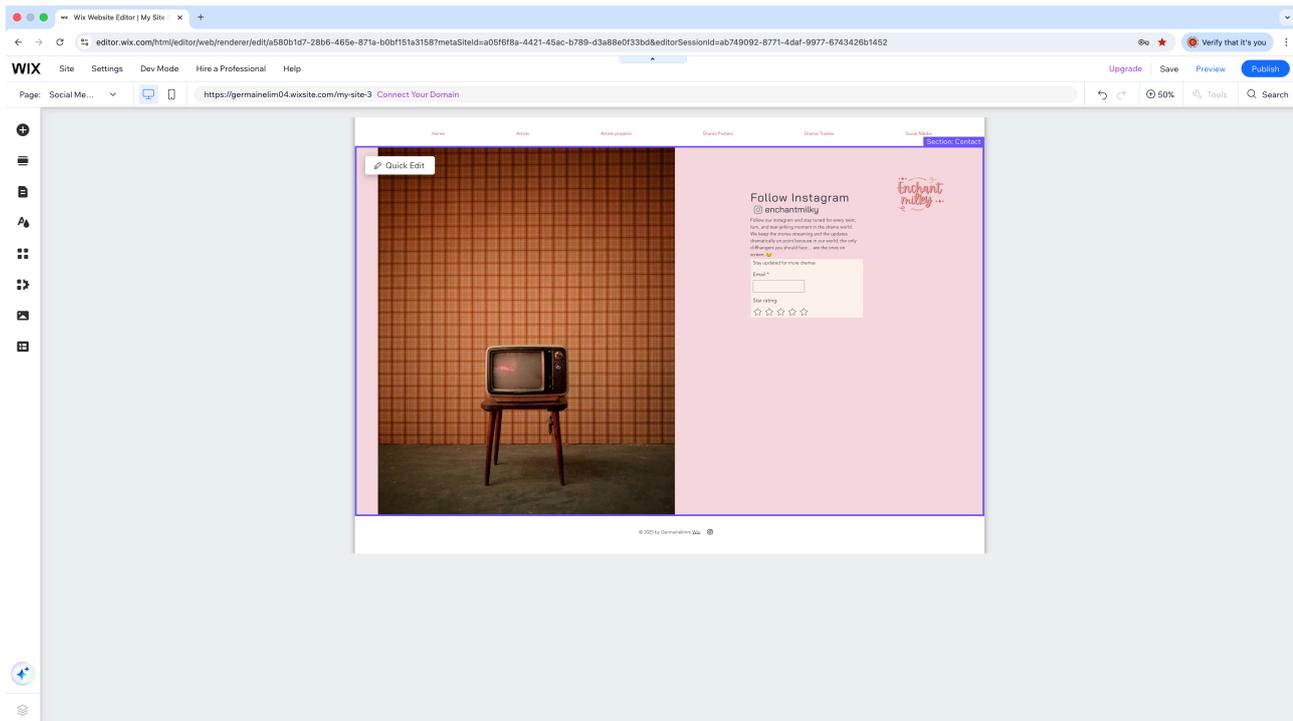

## Drama Posters (WIP)

This page is for the posters of the dramas for promotion and showcase the different genres to attract different audiences and fans. I have updated some pictures and fonts for each category.

## Contact Page (Work In Progress)

This Page is for following social medias and leaving comments/ opinion on the shows

I have decided to use Wix because it made the whole process of building my website a lot easier and faster. I could just drag things around, add pictures, change text, and see the results instantly. It felt more like designing than building a website from scratch.

Wix also gave me a bunch of templates to choose from for media site. But I find them not suitable for me so I decided to start a blank page and start creating it from there. Most of the tools I needed like galleries, buttons, and pages were already built in, so I didn't have to look for anything extra.

Another reason I liked Wix is that it takes care of the "tech stuff" for me. It hosts the site, keeps it secure, and makes sure it works on phones and computers. All I had to do was focus on the content and how I wanted my site to look.

Wix let me work quicker, stay organized, and actually enjoy the process instead of getting stuck on technical problems.

While using Wix I had the difficulty to add the trailers in because I duplicate the template then I tried to change to a different trailers it ends up overlapping the other trailers so I figured out how to solve it by using other design options and now it works.
