

Giant Frosted Donut Pool Float

Marketing Description

Have some fun in the sun with the original Giant Frosted Donut Pool Float—it's sure to make all your summers more colorful! Over 4 feet wide with dimensions of 48 x 48 x 14 inches, this float provides plenty of space for taking a leisurely dip in the pool. When you're done, just wipe it down and store it away—easy deflation makes this step even simpler. High safety standards and quality vinyl make this pool float the perfect inflatable device for days on the water, whether you're at the pool, beach or lake. Purchase it for the sweet-tooth in your life or use it for your own water activities.

Feature Bullets

- Comes in a colorful and bright Strawberry color for an appealing poolside view
- Over 4 feet wide for ample lounging room while in the pool
- Easy inflation, deflation and wipedown for quicker setup and storage
- Inflated dimensions measure 48 x 48 x 14 inches
- Consists of sturdy vinyl with UV protection printing

Short Description

BigMouth Inc.'s best-selling Giant Frosted Donut Pool Float sits at 4 feet wide with dimensions of 48 x 48 x 14 inches, providing plenty of space for a leisurely day on the water. It comes in a Strawberry hue and consists of durable, UV-protected vinyl for additional peace of mind and safety while at the pool or beach. It is also safety-tested and insured to meet the highest safety and quality standards.

Long Description

The Giant Frosted Donut Pool Float from BigMouth Inc. has been much imitated but never equaled. Its incredible ease concerning setup and storage makes it a stand-out—simply wipe it down whenever you need to clean it. Inflation and deflation are simple enough to make your day on the water a breeze, leaving you more time to enjoy yourself. As one of our best-selling products, this classic pool float will stand out amongst many other inflatable devices for its whimsical, fun look and high-quality material.

When you buy our Strawberry pool float, you can chill out in the water with over 4 feet of space to stretch out on. Dimensions of 48 x 48 x 14 inches mean this inflatable is the perfect size for your beach day activities or lounge sessions at the lake.

Durable vinyl material means you can trust this pool float to stand up to the test of time, giving you many more days of fun in the sun ahead. Printing with ultraviolet protection allows you to enjoy this inflatable's lively pink pattern for longer without worrying about fading. Most importantly, all our

inflatables are certified by a global lab, backed by a \$10 million certificate of insurance and safety-tested to meet strict standards. When you want the best quality in water inflatables, choose our Giant Frosted Strawberry Donut Pool Float.

[Lasco Sch40 90 Degree Elbow](#)

Marketing Description

This LASCO Schedule 40 90-degree elbow fitting is ideal for contractors looking for reliable PVC fittings for projects. Made in the USA and NSF- and ASTM-approved, this fitting provides a durable connection for residential and commercial piping use, such as with spas, pools, sprinkler systems and water systems for farming applications. Adequate material at the stress points ensures this product will hold up in various environments, and evenly trimmed openings offer a smooth fit. For those looking for quality joints from a company committed to sustainability, you'll find an excellent choice in LASCO Fittings. Like all our products, this joint is manufactured to provide cost-effective value and consistent reliability on the job.

Feature Bullets

- Made of durable polyvinyl chloride (PVC) with high-impact and high-tensile strength
- Intended for pressure applications and potable water use
- Minimum working temp is 32 degrees Fahrenheit; maximum is 140 degrees Fahrenheit
- Complies with NSF 14 and 16 and ASTM D 1784 and ASTM D 2466
- Installation requires no cutting tools
- Evenly trimmed openings for easy installation with primer and solvent cement

Short Description

The Slip x Slip Schedule 40 90-degree elbow fitting has a diameter of 1 ½ inch on both ends. A set of 25 units comes in one carton when ordering from LASCO Fittings, and you can accommodate 80 cartons per pallet, totaling 2,000 units. This PVC elbow joint works well for residential and commercial potable water use, with a minimum working temperature of 32 degrees Fahrenheit and maximum of 140 degrees. Compliance with several industry standards makes it a reliable addition to any Schedule 40 pipe runs.

Long Description

Get the best in high-quality pipe fittings with LASCO Fittings' 1 ½ Slip x Slip Schedule 40 90-degree elbow joint. Made for transporting liquids in commercial and residential applications like pools and water systems, this elbow joint provides seamless construction for reliable function. Use it whenever you need to integrate a 90-degree turn into a Schedule 40 pipe run.

Mahalia Cooks

With conformity to NSF 14 and 16 and ASTM D 1784 and D 2466, this fitting complies with strict industry standards for optimal function and safety. LASCO Fittings upholds a commitment to sustainability and high-integrity products, meaning our offerings have earned a reputation for their high quality and innovative designs. We conserve resources and recycle materials to ensure our products have a minimal environmental footprint. In accordance with this, the Schedule 40 90-degree elbow fitting offers stable performance and a long life span to eliminate the need for frequent replacement and subsequent material waste.

Smooth surfaces and interiors on this 90-degree elbow joint ensure a seamless design and an easy fit for your applications. This fitting can handle a range of working environments, with a maximum temperature limit of 140 degrees Fahrenheit and a minimum of 32. Install it using solvent cement and primer and forgo any extra cutting tools or complex steps. Your application will be up and running in no time.

[48ft DEV Diatomaceous Earth Filter](#)

Marketing Description

Get a heavy-duty filtering solution for your pool by choosing the Jandy 48ft DEV Series Diatomaceous Earth Filter. This filter boasts a maximum working pressure of 50 psi, and its extra-large thermoplastic tank supports longer water cleaning cycles for more efficient water filtering. This filter is equipped for use with three backwash valve options, including a slide, multi-port and 2-in-1 Never Lube valve. Using diatomaceous earth enables this filter to trap debris even 5 microns small, giving you a high-power water cleaning solution that will leave you with a crystal-clear pool. Invest in this pool cleaner from Jandy today, and you'll reap the benefits of easy system maintenance and comprehensive pool cleaning.

Feature Bullets

- Clean/Dirty indicator for easier and more timely cleaning/maintenance
- Extra-large 2-inch drain port for simpler debris cleaning
- Compatible with three backwash valve options for more versatility
- Easy textured grips for more convenient handling and installation

Mahalia Cooks

- UV- and corrosion-resistant extra-large thermoplastic tank, which facilitates longer water cleaning cycles and increased efficiency
- Maximum working pressure of 50 psi and maximum flow of 96 GPM
- Shipping weight of 95 lbs. and height of 41 inches

Short Description

The Jandy 48ft DEV Series Diatomaceous Earth Pool Filter has a maximum working pressure of 50 psi, shipping weight of 95 lbs. and height of 41 inches. At a six-hour capacity, this device can filter 34,560 gallons of water—the eight-hour capacity model handles up to 46,080 gallons. The 48ft model within the DEV series offers a maximum flow of 96 GPM with a design flow rate of 2.00 GPM/ft². Some other notable product features include a clean/dirty gauge, compatibility with three backwash valve types, UV- and corrosion-resistant thermoplastic and a heavy-duty band clamp.

Long Description

When you need a durable and high-powered pool cleaning device, turn to Jandy's DEV series 48ft pool filter. This pool filter uses diatomaceous earth—which consists of fossil exoskeletons—to clean water efficiently and quickly, picking up particles as small as 5 microns. With a six-hour capacity of 34,560 gallons and eight-hour capacity of 46,080, this machine will get the job done in time for your next pool celebration.

The filter body consists of UV- and corrosion-resistant thermoplastic, and the tank is extra large to accommodate a longer water cleaning cycle. The tank design ensures your device will remain durable and perform well for a long time, providing you with great value and efficiency for your money. The tank also boasts many features that make for a simpler water filtering experience, such as textured, easy-grip handles, a customizable pressure gauge with a clean/dirty indicator and a large 2-inch drain port for quick filter draining.

Our 48ft DEV Diatomaceous Earth Pool Filter is also certified under the NSF/ANSI Standard 50 for swimming pools and other recreational water facilities. With this certification, our pool filter ensures safe, efficient and quality operation for all your pool filtering needs. Invest in a pool filtering solution with us, and pool maintenance will become easier than ever before.
