

AN EXTRACT SCIENCE

Some believe you need a master barista to make the perfect coffee. De'Longhi, however, has found a way to instil that level of craft and dedication, along with dynamic design and technology, into its PrimaDonna Elite Experience fully automatic coffee machine.

Just about gone are the days of "white with two". Now, it's all about perfecting that piccolo, macchiato or creamy flat white and serving it at home to suitably impressed coffee connoisseurs – also known as friends and family. As the world gains more coffee drinkers than ever, tastes are evolving and becoming more discerning and unique. De'Longhi's stylish, versatile and easy-to-use PrimaDonna Elite Experience coffee machine has, then, entered the market at just the right time...

WELL-GROUNDED FEATURES

There are plenty of ways to enjoy coffee, which is why De'Longhi's PrimaDonna Elite Experience comes with a host of intuitive touch-control functions to help you create everything from cappuccinos to iced coffee and even hot chocolate. Create user profiles that save your favourite beverage at your preferred temperature and even with the right aroma strength. You can also use the Coffee Link app to adjust settings and more.

CAFE-QUALITY RESULTS

Forget the barista in the old-fashioned apron and flat-cap creating cute patterns in the crema. The PrimaDonna Elite Experience can make a coffee for you just as well or better. Extract a creamy, dense, aromatic coffee every time with an even grind, precision tamping and ideal infusion of temperature and pressure. Is this science? Is it art? One thing's for sure, the result is consistently sublime coffee.

CAFFEINE COOL: the PrimaDonna Elite Experience can make your favourite beverages – hot, warm or cold – with one touch. Use the intuitive interface or Coffee Link app (opposite page), and customise your drinks to match your taste.

"It's stylish, intuitive and easy to use. With the app, I can order my regular coffee from my phone while still lying in bed. Genius!"
