

MOONSTONE DREAMCATCHERS

A dreamcatcher is a protective charm, usually hung above a bed. The circular shape symbolizes the sun and moon. The webbing traps negativity, which then perish at dawn's light. The opening in the middle of the web allows good affirmations. The feathers guide positivity, while the precious stones and crystals give protection. Each Moonstone Dreamcatcher is made by hand in Santa Fe, New Mexico. We use natural crystals and precious stones. Custom orders can be accommodated.

There are many different ways to make and use dreamcatchers. We create dreamcatchers in a manner that is most meaningful to us, but once it is yours, it can signify or symbolize anything you wish.
