

Full-Service Provider of Durable Medical Equipment and Mobility Solutions

Stay in the Home with GHA Equipment and Supply

GHA EQUIPMENT AND SUPPLY professionals are ready to answer your questions, assess patient needs and perform the work needed.

GHA Equipment and Supply is a national distributor of all durable medical equipment and a leader in the sale, installation and maintenance of ramps, lifts and mobility equipment. Our customers include patients seeking assistance to return to mobile and active life; health systems, hospitals and providers looking for solutions for their patients; and representatives for the Veterans Administration. GHA Equipment and Supply aims to keep patients in their home and allow them to age in place while making the ordering process and delivery of all durable medical equipment as easy as possible.

WE'VE GOT YOU COVERED!

Our well-trained and expert staff can provide:

Accessibility:

- Vehicle lifts
- Stair lifts
- Vertical porch lift
- Door openers
- Ramps

Durable Medical Equipment:

- Manual and power wheelchairs and custom seating
- Power scooters
- Mobility devices – walkers, rollators, canes, crutches
- Bathroom safety equipment – commodes, raised toilet seats, shower chairs, grab bars, etc.
- Hospital beds
- Compression garments
- Bracing

Respiratory Therapy:

- Nebulizers
- Oxygen
- CPAPs and BiPAPs

STAIR LIFTS

Lifts are available for curved or straight stairs and will hold up to 350 lbs. Options available: fold-up arms, manual or power folding rail, manual or pushbutton automatic operation, swivel seat, safety sensors, chair arm or wireless controls and ergonomically designed seats/armrests.

VEHICLE LIFTS

GHA works with you to attach the best lift for the patient's vehicle and scooter or power wheelchair. We install an easy to use, safe unit that requires little to no modifications on the device and will hold up to 400 lbs. Lifts can be installed for outside or inside of vehicle storage depending on spacing.

RAMPS

Ramps are solid aluminum, so they will not deteriorate in the outdoor elements. They feature superior slip-resistance to maintain traction in any weather. Black, bronze or tan powder coating is available for an additional cost.

DURABLE MEDICAL EQUIPMENT

WHEELCHAIRS

GHA offers manual or power wheelchairs. Our staff is very knowledgeable and will help you find the right mobility product for your patient.

SCOOTERS

Scoters are often the best option for people who need occasional assistance with mobility and who lack sufficient strength and balance to use a cane, walker or manual wheelchair. Scooters are steered via handlebars not a joystick and are available in several styles and colors.

MOBILITY DEVICES

GHA offers a myriad of mobility aids including walkers/rollators, canes and crutches. If your patient needs it, GHA provides it.

BATHROOM SAFETY PRODUCTS

For people with mobility issues, bathroom safety items are a necessity. Commodes, grab bars, shower benches, raised toilet seats and more are available to help patients stay safe and independent at home and in the bathroom.

COMPRESSION AND BRACING

We carry a wide variety of compression socks and stockings for the legs and arms from high-quality manufacturers to help alleviate swelling. GHA also has a full line of rehabilitative braces for the knee, back, elbow, ankle and wrist. Specialists are on staff to properly fit patients for a custom compression garment or brace.

VERTICAL LIFTS

GHA will install safe, quiet, reliable, compact vertical platform lifts inside or outside of the home so the patient can access each floor, patio or balcony. Lifts have a weight capacity of up to 750 lbs. and operate at the push of a button. All lifts have an emergency stop button and will shut down when an obstruction is sensed.

DOOR OPENERS

GHA can install automatic door openers that work with nearly any style of door. Openers work with a wheelchair-mounted remote control and other environmental controls that are compatible with most types of disabilities.

RESPIRATORY THERAPY

CPAPS/BIPAPS

CPAP and BiPAP machines have evolved to include advanced technology that has resulted in smaller, lighter units that provide gradual air pressure adjustments, heated humidity and a quieter treatment experience. We can help assess patient needs and provide the appropriate machine.

OXYGEN

Oxygen concentrators provide a safe and efficient way to improve the quality of life for individuals who require supplemental oxygen. Concentrators weigh less than 50 pounds and will be serviced and maintained by GHA, but they can be refilled with at-home transfilling systems from GHA.

NEBULIZERS

Nebulizers are often prescribed for asthma patients and deliver the same medications as metered-dose inhalers (MDIs) by turning liquid medicine into a mist to help treat asthma. They come in electric or battery-run versions and are available in a portable size or a larger size that's meant to sit on a table and plug into a wall.

Simplifying DME

To stay
independent at
home, trust GHA.
