

# Technical "Glitch-Sweets" and Cakes

By Cassiopeia | September 06, 2022

So, you've got an idea. Maybe you've even found the first few people interested in joining your project, but the concept hasn't reached the implementation stage yet.

Not sure how exactly you want to design your RP? No clear picture of how everything should be organized? Well, wonderful! In this article, I'll try my best to help you with that and close all those old "gestalts." Let's fly!

## **The Foundation**

Before moving directly to the design, you need to decide how exactly you want everything to be set up. For example, where will you put all the information: the plot, rules, character sheets, and other components?

First of all, I want to note that there is no "universal" way to design an RP—it's all limited only by the wild imagination of the admins and the author. However, there are certain systems that will make it easier for you to navigate. Here are two basic options:

**1. Telegraph** — A versatile tool for writing articles in Telegram. Information about the world can be presented as a single article, just like character sheets and everything else. The beauty of this tool is that it allows for beautiful text formatting, adding images with descriptions, and—importantly—leaving links to external sources. *Check out the details here.*

the lost and vengeance against the inhumane reign supreme.

On the air is the indefatigable host **Cassiopeia**, ready to add you to the list of survivors and provide all the necessary information for your survival.

## RADIO DEAD BEAT 2008

**SURVIVOR PROFILE:** name, age, weapon, biography, fact's, appearance

Правила выживания

Начало апокалипсиса

*Telegram posts and chats gathered via ControllerBot (Radio Dead Beat RP)*

This setup allows you to pack ALL the info and features of the RP into one convenient and pretty post, so your role-players don't have to scan the entire info channel with crazed eyes every time they need a specific point. You can do this via **ControllerBot** (stay tuned for the

manual at the end). ControllerBot posts can include not just Telegraph links, but links to other chats/channels/groups and external sources.

## **2. Navigation Post**

The second option is creating navigation posts in the info channel (just don't forget to pin it at the top). Note that in navigation, you can add links to specific posts in your channel (copy the post link, not the text) as well as Telegraph links (hyperlink the word with the article link).

You can even combine these two approaches.

•Project "New Horizons"   
 SPACE\_NAVIGATION

---

•|PLOT|•

 Planet Solaris•

 History and physics of the world•

 Project "New Horizons"•

 Project Atlas (2025)•

 Endurance |ship log|•

---

 •|RULES|• 

•|RULES|•

---

 dossier

 cosmoflood

 role-playing rooms (locations)

 memchanski lore

---

*Telegraph articles not joined by ControllerBot + regular posts collected in navigation*

Once you've decided on the "Foundation" of your RP, we can safely move on to the design of the info channel and its branches (RP rooms, character sheets, etc.).

---

## **Types of RP Design**

Now that we have a general vision, what's next? Next, everything depends entirely on the richness and unrestrained nature of your fantasy.

Do you want to introduce extra "perks" like news sections, specific rubrics, or even quests that drop your players into a specific plot? Even the most mundane and seemingly boring things can be served in a fun way using the wonders of a creative approach. *Example of rules:*

# КОСМІЧНІ ПРАВИЛА

## funny rules example

The Admin's flag is in your hands, ladies and gentlemen! Maybe you want to put character sheets directly into the info channel instead of Telegraph or a separate room? Do it with originality and taste!

To decorate your channel, why not add a bit of beauty or even music?

## RP Mechanics: The Rooms

# Something's missing...

Whoa, our RP is ready! The info channel is blooming, we can star..wait, hold on... What about the gameplay itself? Naturally, the info channel is not the place where the action happens. We need a new space. Maybe even several.

- **Option A:** Open a new group for a location and leave a link to it in the info channel. This is the simplest and most popular way.
- **Option B (The "Channel-Comment" Method):** Create a separate channel, link a group to it, and enable comments. Posts on the channel act as locations, and the comments section becomes the place for player posts.

Штат Аризона  
*Desierto de Sonora*  
2035 год

Ангар Сигма – совершенно гигантских размеров строение, расположенное посреди пустыни Хила. Сооружение, с виду неприметное, уходит вглубь под землю на несколько миль. Здесь расположен тот самый грандиозный ковчег "судного дня" – Endurance. Корабль окружён установкой Аxiон – технологией, позволяющей в несколько AdS добраться до нужной координаты в пространстве.

### Капитанский Мостик.

Находясь практически в самом центре корабля (третий уровень), данное место – его сердце и, если можно так выразиться, душа. Оснащенный новейшими процессорами, сенсорами и мониторами. он позволяет без

усили  
всем  
Если  
– все

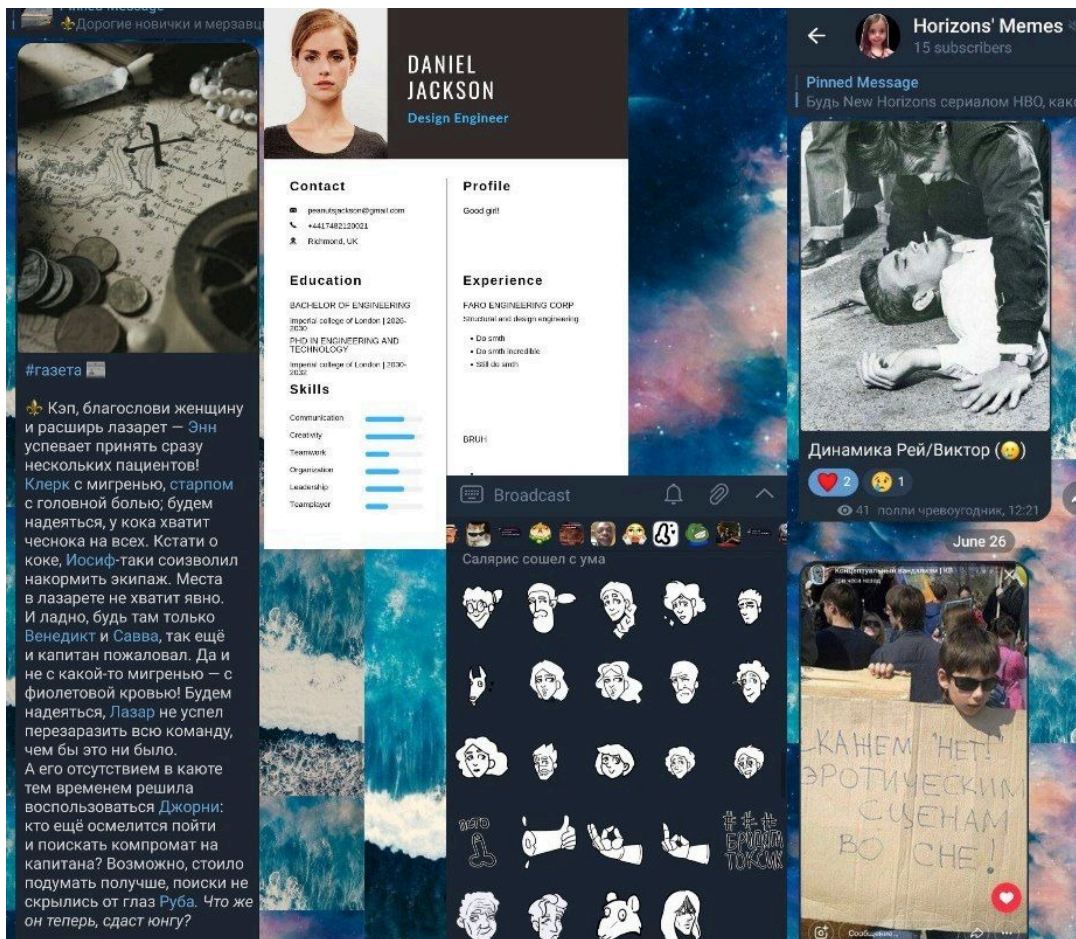

---

## Extra Perks

Now that we have the essentials, let's add some "spice" to the project. To keep participants truly involved and turning into close friends, you can introduce several cool features:

- **The Meme-Basement:** A place where players share local memes about the lore and characters.
- **Custom Sticker Packs:** Create your own and link it to the off-topic chat.
- **Special Events Post:** A dedicated spot for things like player birthdays to keep the atmosphere warm.
- **In-Game Resumes:** Or other "documents" if it fits the setting.
- **Q&A Bot:** Or even a mini-orientation test for new players.

---

## Bonuses!

## **ControllerBot: Instruction Manual**

To wrap it all up, if you have any questions or want to know something in more detail, don't be shy — write to me! I'll show you, explain everything, and treat you to some cake 🍰🎂

Good luck to all you dear admins in bringing your ideas to life!
