

Revision Memo for Major Project II

1. Overall, my peers had positive feedback to give for my Major Project II, but they did have some suggestions to improve it. They helped me to see some places where my writing lacked professionalism and proper citations. They also suggested that I add more depth to my thesis statement and conclusion and more detail to my personal examples to strengthen my analysis.
2. 2. In order to revise my Major Project II, I am going to start by making my thesis more specific. I will do this by including more examples of how the genre of social media is used, mentioning how each social media platform has its own purpose, and how each platform features its own form of communication or genre. I will also rework my conclusion to make it more than just a summary of the paper, adding detail and a concluding sentiment. I am also going to add more personal examples to show the way that I personally use social media, which will add more details to how the genre of online platforms manifests in my own use of the platforms. Finally, I am also going to correct my works cited page to include Sommer-Farias and Gevers and add page numbers to my in-text citations.
