

Radicle™ by Kerry

Deliver the primal taste and aroma pets crave

Pet owners are more likely to consume a meatless diet.

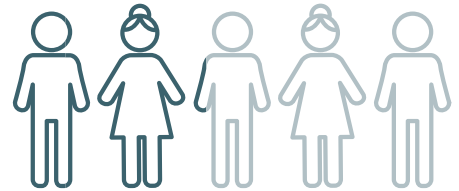

Taste continues to be the largest barrier to plant-based meat products. As plant-based innovations progress, consumers will expect meatless products to closely replicate the taste and richness of meat for their pets. Our Radicle™ portfolio of unrivalled taste, nutrition and functional solutions for plant-based pet foods can help you seamlessly bring vegan or mixed protein products to market that can mask unfavorable notes from common plant protein sources and deliver the authentic flavor and succulence pet parents expect from animal protein.

12%

of pet owners consider themselves vegan or vegetarian. Of consumers that do not currently feed their pets plant-based diets,

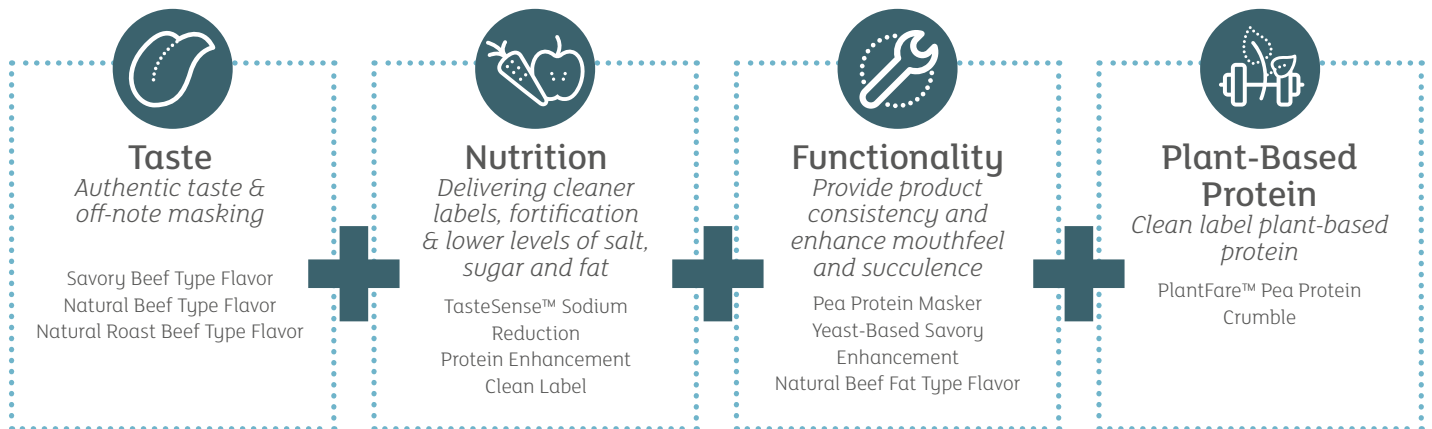

45%

are interested in learning more about the concept.

What it is

Radicle™ by Kerry is our Taste & Nutrition solutions platform for plant-based food, encompassing taste, nutrition, function, sustainable plant proteins & plant-based dairy.

What it Means for You

- Vegan & vegetarian
- No artificial colors or flavors
- Non-GMO
- Processor-friendly ingredient
