

# CLEAN WATER AND HOPE FOR ZAMBIA

**J**eff, thank you for your partnership with Unto® and your generosity to repair clean water wells in Zambia. We are pleased to report that the well repairs you helped fund in the Chibombo District of Zambia are almost complete. Families now have the clean water they need for farming and daily life. People are moving to the district to take advantage of the farming and economic opportunities in the area. The newly repaired wells will ensure families continue to have access to safe, clean water.

Your generosity also helped fund well repairs in the Rufunsa District. The area serves as a cultural hub and yet many people still lack access to clean water. The local staff team has faced delays in their shipment of parts, weather challenges and a broken down work vehicle. Because of these unforeseen issues, the well repairs have taken longer than planned. After the team completes the Chibombo District repairs, they will focus on the well repairs in Rufunsa. We look forward to providing you with a full report in a few months once all of the well repairs are complete.

## Project Timeline

- The final well repair in Chibombo will conclude in the next couple of weeks.
- The local staff team will host well-opening ceremonies and show villagers how to use and care for the wells to ensure long-term functionality.
- Well repairs in Rufunsa will begin mid April.
- After the well repairs are complete, the local staff team will continue building relationships and supporting the communities served so they continue to experience growth.
