Portfolio Parts 2 & 3

12/15/2025

Assignment 1: Multi-Family Design Documentation Package Design Reflection

Questions:

- My level of effort on this assignment was a 10/10.
- I learned how to document design decisions in an informative and concise package. By using cutsheets as a document tool, annotated furniture plan to decide where items will go in the floor plan, rendering a clean furniture plan and finalizing the plan and legend to show where each item will go.
- Yes, the information from this assignment will be very beneficial in the future.
- This will be useful in all stages of the design process.

Assignment 2: Final and Recorded Presentation:

- My level of effort on this assignment was a 10/10.
- Yes, I was able to follow guidelines in Canvas. The instructions were very detailed and this was helpful.
- Yes, I used knowledge from previous classes and what I learned in this class.
- I learned how to organize my design decisions and communicate my ideas through not only written cutsheets but with drawings and color as well. I enjoyed the hands-on learning approach and experience to connect our work together at the end of our course.
- I wish I would have learned more about photo shop and how to correct my drawings. Maybe I will learn how to use this by taking a photo shop class.

Favorite Assignment Reflection Questions:

- My favorite assignment was my furniture plan color rendering.
- My effort was a 10/10.
- Yes, I was able to follow guidelines provided in Canvas on this assignment.
- I used my knowledge I learned in this class to work on this assignment.
- I learned how to represent FF&Es with drawing and colors.

- I enjoyed seeing the final piece of work and how I could improve it from the first color renderings to the last one.

Final Reflection for the Entire Course:

- There are so many things I learned from this class. It is hard to know where to start. I was so nervous about learning to draw pictures. I feel like I improved a great deal from the beginning to the end.
- Some of the core ideas I learned were how to sketch, develop and practicing design concept and ideas, isometric drawing, using line weight, perspective drawing, using the elements of design, listing of cutsheets, using furniture plans and legends, using power point to improve my presentations, color rendering, communicating my ideas in visual and verbal ways.
- Yes, the material we covered in class affected how I think about interior spaces and how I will work in the future.
- I will use the information I learned from this course in the future.
- I think the first drawing we did the isometric drawing I learned the most from. I probably repeated it 20 times until I could do it.
- The first concept package was a bit confusing for me. I had too many ideas going through my head and after I decided to narrow it down it all became clearer. I believe putting more work into my earlier design package helped me to develop a detailed and much improved final presentation.
- Hope you think so as well. I really enjoyed this class. One of my favorites so far. It is a shame you are leaving us. I wish you all the best with your future full-time position.
