

Valac

Burning Dawn of Vengeance

Black Gangrene Productions / Banner of Blood ·

"Burning Dawn of Vengeance" is visceral and powerful from beginning to end. A wild ensemble of unforgiving riffing switches from violent more direct displays to melodic quasi-hypnotic sections exhibiting Valac's evolution in terms of arrangements and the build-up of the right atmosphere. Variety is therefore a prominent element throughout the whole record.

Fast wicked strikes are interlaced with reflective and melancholic mid-tempo moments nonetheless maintaining the distinctive rawness and grit of the project.

Released on Vinyl LP by Black Gangrene Productions and Banner of Blood, "Burning Dawn of Vengeance" is a testament to the vitality and strength of a project which quite well represents the best the USA has currently to offer in the most subterranean fields of Black Metal.
