

NATURE'S SYMPHONY

Once upon a time...

One piece, two pieces, three pieces and more
One seed, two seeds, three seeds and more
One dust, two dusts, three dusts and more
Organizing and creating, lives aroused.

Big
Bang

Merging, melting, mixing, emerges an *alchemy*.

Flows fighting over forces. Linger by the lake, tears dropping from the sky.
Staring up, the stars dancing over the dark. Wistful, wind whispers into our ears.

Noise, sound, music, tune.
What a delightful *melody*.
Nature over nurture has grown and birthed *harmony*.

By birthing species, was built diversity
By birthing sceneries, was built unity
By birthing abilities, was built acoustic
By birthing our roots, nature has built a *symphony*.

Euphonious, feelings and emotions bonds and bounces, loving of being in conjunction.
Trees, branches, leaves.
Oceans, seas, lakes.
Clouds, water, drops.
Seeds, flowers, bees.
Caterpillars, cocoons, butterflies.

Place, path, purpose.
Euphony is evolution.

Once upon a time... happily they lived.

Once upon a time, able will be the humans to find it again.
