39+ Proven Strategies to Help Obtain Anything You Want For Pennies...

INSIDE: You Will Learn Strategies On How To:

GET FREE ELECTRICITY: Avoid that pesky (and quite expensive) monthly bill with this POWERFUL tactic! Surprisingly simple to implement.

MAKE YOUR CAR PAY FOR ITSELF: Everyone knows that most cars depreciate in value over time. What if there was a way to rewrite the script and turn your car into one of your best assets? This technique works regardless of the type of vehicle or age.

OBTAIN MASSIVE DISCOUNTS ON YOUR NEXT VACATION: Like to travel? Why pay full price to rent a car or RV when you could simply use this strategy and in some cases pay only \$1 per day. I was blown away that this exists.

Straight From The Desk of Zach Scheidt, Best Selling Author:

Dear Reader,

The system is rigged!

It is designed to take as much money as possible from hard working Americans.

Think about when you were younger.

How much was a gallon of gas?

How about a gallon of milk?

What about dinner and a movie?

Compare those numbers to what they are today, and you will notice a staggering difference.

Just the other day I was watching the news and they said we could see a doubling in product costs every 20 years. (at the average rate of inflation.)

At first, I didn't believe this so I set out to do my own research.

What I found blew my mind.

If you go back to 1958 it appears that we have seen a little over double costs every 20 years.

Inflation Calculator

If in (enter year)

I purchased an item for \$

then in (enter year)

that same item would cost: **\$8.86**

Cumulative rate of inflation: **786.3%**

[CALCULATE](#)

Take a look at the calculation above and you can clearly see a massive difference.

An item that could be purchased for \$1 back in 1958 would now cost \$8.86. That is over a 780% increase!

That means you need about 8 times the purchasing power now just to acquire the same products.

Put another way, **you need to have 8 times more money saved if you hope to keep the same lifestyle.**

That's a scary thought for the over TEN THOUSAND Americans that enter retirement every day...

And I'm here to help, you.

You see, as a former hedge fund manager, I've learned the strategies that the rich use to get richer.

Oh, and you should know...

I'm also the father of seven wonderful children. Two boys and five girls.

My family is my number one motivating factor.

My career began as an analyst at a private \$130 million hedge fund.

Within a few years, I was managing the investments of some of the richest people in America.

I specialized in providing income producing assets through unconventional sources.

This earned me the nickname **"Mr. Income."**

Life seemed good.

I was paid very well...

But I wasn't truly happy.

I hated spending so much time away from my family.

I wanted to do more than just help the rich get richer.

So I decided to leave and focus on sharing my knowledge with people that really need it. Today...

I have one goal in mind:

"To Find Passive Income Strategies That Could Either Cut Costs OR Make Money With Little Effort Required"

Strategies anyone could use regardless of their background or financial status.

I don't usually brag.

But I must say. What I and my team put together is nothing short of Amazing.

We put together a short, but very powerful book that could add thousands of dollars per year to anyone's pocket.

In this book, we share strategies on:

- ✔ Getting Free Repairs On Any Vehicle You Own
- ✔ Increasing Your Library With Free Physical Books (Or Audiobooks If You Prefer)
- ✔ Cutting Your Cellphone Bill To Nearly NOTHING!
- ✔ And Many More!

At first, we were going to limit this information to only our most loyal readers.

We planned to charge hundreds of dollars for this information.

And to be honest it would be totally worth it.

The information contained within could easily put thousands of dollars per year back into your pocket.

Imagine if you had the ability to roll back the clock on inflation.

What would life be like if you could pay 1950's prices again?

How much could you save?

Many of the strategies in this book could be the next best thing.

So, for now, I am allowing the public to get their hands on a copy of this book.

All I am asking is for you to help cover the small costs incurred in researching these strategies.

Nothing crazy, this would actually be cheaper than personally taking me out for a cup of coffee.

And it's more valuable because you will have access to these strategies anytime you need them.
