

Your support makes a tangible difference in the lives of students like me.

Dear [NAME],

My name is Brayden Estes, and I am a proud senior in the Auburn University College of Nursing. I want to share with you how the generosity of donors has shaped my journey.

Coming from the small town of Kimberly, Alabama, I was looking for a college experience that felt like home. Auburn University welcomed me with open arms the first time I stepped on campus, and I felt like I had been here my whole life.

I further found my place in Nursing, where the faculty and staff are exceptional.

Donor generosity enables them to stay up-to-date with best practices, and they have challenged and encouraged me in my journey. I have also had access to exceptional learning experiences, including the EAGLES Simulation Center, where I've been able to build my skills and confidence in a hands-on clinical setting. Opportunities like these have prepared me to care for patients with knowledge, compassion, and confidence.

I've also seen the impact compassionate care can have on individuals and families across our state through Auburn Nursing's Outreach program. Experiences like these have strengthened my calling to serve others and confirmed my goal of beginning my career in the Cardiovascular Intensive Care Unit at Princeton Baptist Hospital after graduation.

Donor support made my education possible, easing the financial burden on my father, a firefighter who works two jobs to help me pay for school. Because of this generosity, he can reduce the number of shifts he has to work. Your support makes a tangible difference in the lives of students like me.

Please consider giving to the Auburn University College of Nursing today.

Thank you for believing in Auburn Nursing students and helping us make a difference.

War Eagle,

A handwritten signature in black ink that reads 'Brayden M. Estes'.

Brayden Estes
Senior, BSN candidate
