Building Momentum for a New Academic Year

Welcome from Artemis

A new academic year has begun and with it, new opportunities to grow, connect, and lead with purpose. Across Artemis Education, our schools are welcoming students with energy and intention, driven by our commitment to deliver holistic, values-led education that prepares children for life. As we expand our group, enhance our campuses, and deepen our curriculum, our focus remains the same: helping young people thrive, academically, socially, and personally.

Our Commitment to Excellence

We start this term with a renewed focus on student wellbeing and learning outcomes. To support this, several schools have introduced a no phone policy during the school day, encouraging presence, focus, and stronger in-person connections.

We also welcome the full integration of CodiPlay across our schools. This award-winning platform introduces coding and IoT through interactive, mobile-first lessons, giving students the tools to think critically, solve problems, and lead in a digital world.

Across Our Schools OR Happenings: Across Our Schools

Queen's Qatar

The new Queen's Sports Centre is now fully open—a dynamic space with a gym, padel court, football pitches, and multi-sport courts built to encourage wellbeing and movement across the community. This term also marks a milestone with the school welcoming its first Year 10 cohort, beginning the IGCSE journey.

ACS Doha International School

At ACS Doha, families and prospective students came together for a vibrant Open House, where they explored our whole-child approach—one that nurtures each student's academic, social, emotional, and physical development—alongside dynamic learning environments shaped by the American and IB curriculum.

The Lisbon International School

The Lisbon officially opened its doors this September, welcoming its founding students into a unique city-based school that combines academic rigour with cultural immersion and creativity.

Northview International School

Northview welcomes its first cohort of high school students, beginning with Grade 9. This expansion marks a key step in offering a full academic pathway within a campus purposefully designed to support inclusive values, flexible learning, and student wellbeing.

Jebel View International School

Construction is progressing steadily at our newest campus in Oman—Jebel View International School. Opening soon in Muscat, the school reflects Artemis' long-term vision for accessible, high-quality education in the region.

Artemex

Term 1 Enrolment Now Open

Artemex enrichment programmes are now enrolling for Term 1. From music and performing arts to robotics and sport, these after-school and weekend sessions are designed to inspire learning beyond the classroom.

Summer Highlights

Summer camps in Qatar and Lisbon brought energy, creativity, and connection. Students explored new interests, stayed active, and built lasting friendships.

Aquatics & Water Polo Launch

This term, we are excited to introduce aquatics programmes and water polo as part of Artemex. These initiatives will run across our schools, supporting fitness, focus, and fun in the water.

Upcoming Events

Stay tuned for a full calendar of community events, performances, and inter-school competitions coming this term. Our schools are places of learning and celebration.

Work With Us

If you are an organisation or educator aligned with our mission, we'd love to hear from you. Let's build the future of education together.
