

CIC Health

Our Legacy

When our nation was grappling with the devastating toll of a global pandemic, CIC Health was there to empower people across America to safely return to work, school, and everyday life.

Our Impact

Through strong public-private partnerships, we worked to prevent serious COVID-related illness and suffering at-scale.

6.5M

Tests

Facilitated
across 18 states

11.8M

Samples

Collected
across 18 states

13.5M

At-Home Tests

Distributed to schools
& community sites

1.2M

Vaccines

Administered in
our home state of MA

We have been a leader in health equity.

1 Testing in-reach for Vermonters

On behalf of the State of Vermont, we launched community testing sites within a 30 minute drive of every Vermont resident.

2 Stopping the spread

On behalf of the Commonwealth of Massachusetts, we operated “Stop the Spread” sites in some of our home state’s most vulnerable communities.

3 Vaccinating Massachusetts

On behalf of the Commonwealth of Massachusetts, we operated hundreds of community vaccination sites across eastern Massachusetts ensuring that every person who could benefit would have access to the vaccine.

4 Closing equity gaps in Boston

On behalf of the Boston Public Health Commission and Boston Public Schools, we launched fixed and mobile clinics to close the vaccine equity gap in the City of Boston.

We got Americans back to their everyday lives

1 We made it safer to return to school

We facilitated over 4M tests and distributed 13.5M rapid tests in educational settings from pre-k to college.

2 We got Americans back to work

We facilitated over 1M tests for our nation's workforce whose in-person work kept our economy moving and our communities safer.

3 We protected those living in congregate settings

We facilitated over 750K tests in long-term care and correctional facilities where rapid detection was critical in minimizing spread.
