

WEBSITE [We may want to edit the last paragraph; a bit too repetitive for his website]:

For the first time, readers will have the opportunity to enjoy *The Driveway Diaries: A Dirt Road Almanac* as it was always meant to be: in an audiobook narrated by author Tim Brookes. A published writer, a professor, and an experienced commentator for NPR, Tim's voice brings the oral tradition to life as he brings listeners into his mind to share these tales.

First published in 2005, and with a second edition underway, *The Driveway Diaries* is a collection of stories about the challenges and small disasters Tim met while living on a dirt road in rural Essex Center, Vermont. Hear Tim's curiosity, frustration, passion, and humor in his ruminations about Vermont, family life, and his ever-evolving gravel driveway.

Tim is the author of fourteen books, including *Guitar: An American Life*, *Catching My Breath*, and *A Hell of a Place to Lose a Cow*, and he is the founder of the Endangered Alphabets project.

SOCIAL MEDIA:

Recording in session! Check out these photos of Tim Brookes recording for the audiobook version of *The Driveway Diaries*.

[We could include captions for each photo, which I would write prior to upload and probably based on what order the photos were in]

[I'm thinking the rest of our social media updates could be a countdown to publication; maybe sharing bits of cover art; perhaps create a word search for people to complete that have words that relate to the text?]
