QuickSeries Publishing and HFACS, Inc. Announce Licensing Partnership

Ft. Lauderdale, FL / [DATE], 2025

QuickSeries Publishing and HFACS, Inc. have entered a multi-year partnership aimed at developing comprehensive educational materials for safety professionals, training managers, and accident investigation experts.

HFACS (Human Factors Analysis and Classification System) is a comprehensive framework that helps organizations understand and prevent human errors by systematically analyzing the root causes of accidents and incidents across complex operational environments.

The collaboration combines HFACS, Inc.'s pioneering research with QuickSeries' three decades of expertise in creating accessible, actionable knowledge resources, producing innovative outreach materials that translate complex safety analysis into practical tools for professionals across multiple industries.

Catherine Boucek, President of QuickSeries Publishing, added, "This partnership reflects our commitment to supporting safety professionals with high-quality, research-driven resources that can make a real difference in preventing accidents and protecting lives."

The partnership launches with two comprehensive pocket guides:

HFACS-Classic provides a comprehensive understanding of the HFACS framework:

- → Learn how to identify and classify active and latent failures in operations.
- → Review systematic approaches to error identification and prevention.
- → Master implementation of HFACS methodologies in accident investigations.
- → Understand the relationship between organizational factors and front-line errors.
- → Access practical exercises to recognize and mitigate potential safety hazards.

HFACS for Healthcare adapts the proven HFACS framework to healthcare settings:

- → Identify unique factors contributing to medical errors and adverse events.
- → Apply human factors principles to improve patient safety.
- → Implement effective error reporting and learning systems.
- → Develop strategies to address systemic issues in healthcare delivery.
- → Build a culture of safety through improved communication and teamwork.

“We’re excited to join forces with QuickSeries to bring our HFACS and HFIX frameworks to life through engaging, accessible educational materials,” said Scott A. Shappell, Ph.D., *Human Factors & Behavioral Neurobiology*. “These resources are indispensable for safety professionals seeking proven strategies to reduce risk and improve system performance.”

ABOUT HFACS, INC.

HFACS, Inc. is a leading provider of Human Factors Analysis and Classification System research and training, dedicated to understanding and preventing human error in complex systems.
