

Power Through Your Summer WITH A MOBILITY UPGRADE

Beach or ballpark, garden or golf course, front porch or forest trail — wherever you'll have your fun this summer, you'll enjoy more of it (with less pain) if your joints can move freely and comfortably through their full range of motion.

Mobility is the simple secret to doing everything you love (and even the things you don't) with greater ease.

Improving or restoring your mobility can help you:

- Prevent injury
- Boost endurance
- Keep joints flexible
- Improve circulation

Discover why Mobility Matters – and why it's time to think about yours – in our new infographic.

★★★★★

"I had neck pain that was so unbearable I couldn't stand for too long at work, drive without pain or even wear the weight of a necklace comfortably... Not long after starting care, **I was suddenly getting through a work day with no pain**, wearing necklaces again and running regularly. **I even signed up for a marathon!**"

— Jaime L.
