

## Learn How PayiQ Streamlines the Onboarding Process with Automation

### Download the eBook

Everybody wants same-day MIDs, but the operational inefficiencies that plague traditional onboarding processes usually make this impossible. That's why PayiQ has been working hard to design a processor that leverages cloud-enabled automation technologies to streamline onboarding.

Our eBook describes how our processor solves the biggest obstacles in the traditional onboarding process—giving you back your time and sanity and decreasing the number of merchants who drop off in frustration at the onboarding process.
