Category: Alcohol Monitoring, Location Monitoring, Community Supervision
Product: SCRAM GPS, SCRAM Remote Breath, SCRAM Continuous Alcohol Monitoring, SCRAM House Arrest, SCRAM TouchPoint, SCRAM Ally

For modern-day community corrections, a one-size-fits-all approach to monitoring often fails to provide the desired outcomes. With each client comes a unique set of risks and needs—effective supervision needs the flexibility to adapt.

That's why the SCRAM Systems product suite offers a full spectrum of monitoring solutions to manage every client. From hardware, mobile apps, and software, SCRAM Systems offers an integrated approach designed to support courts, supervising officers, and agencies as they guide clients on the path to rehabilitation and sobriety.

SCRAM Systems has built a reputation on providing a **continuum of supervision in electronic monitoring.** This means moving beyond singular tools and delivering a fully integrated suite of solutions, allowing for evidence-based supervision that leads to long-term success.

Tailored Solutions for Every Caseload and Client

From high-risk, repeat alcohol clients to low-risk individuals requiring less intense location supervision, the SCRAM Systems suite of products has the right solution for every client:

- **For High-Risk/High-Need Clients:** Solutions like **SCRAM Continuous Alcohol Monitoring® (SCRAM CAM®)** offer 24/7 transdermal alcohol testing, eliminating testing gaps and increasing client compliance rates—ultimately helping reduce recidivism. For sex or violent offender caseloads, **SCRAM GPS® 9 Plus** provides robust, continuous tracking with superior analytics, advanced tamper detection, and extended battery life. And, working in conjunction with SCRAM GPS 9 Plus, the **SCRAM Ally® Victim Notification mobile app** offers support for domestic violence victims and may help give them peace of mind. These devices are crucial for enforcing stringent conditions and ensuring community safety while supporting long-term behavior change.
- **For Lower-Risk Clients: SCRAM Remote Breath® Pro** offers portable, discreet

breath alcohol testing with flexible scheduling and a GPS point with every test. The **SCRAM TouchPoint™ Client Engagement mobile app** provides remote check-ins with biometric verification, secure messaging, and advanced location features like passive 24/7 tracking, allowing officers to adjust supervision intensity as needed.

Additionally, SCRAM Systems' monitoring solutions work together to cover almost any supervision situation. Supervision officers can easily scale monitoring up or down based on client progress, ensuring every client is covered and can meet the terms of their supervision plan.

Moving Beyond Supervision with Powerful Data

SCRAM Systems reporting options offer unprecedented possibilities to acquire, store, analyze, evaluate, and convert raw data into knowledge. Supervising authorities can gain more insight into compliance rates, average monitoring period, behavioral trends, and more. SCRAM Systems' comprehensive analytics can help officers assess, adjust, and report on a single client or entire programs with the click of a button.

Officers also have the ability to customize notifications and alerts and manage the presentation of a program's data to meet the needs of courts, internal audiences, and supervising entities—making it easy for every point of contact to evaluate program and client performance.

Dynamic analytics and reporting tools provide invaluable insights into program performance, helping supervising agencies make data-driven decisions. Additionally, courts receive accurate, objective, and court-validated data, contributing to stronger legal outcomes and increased public safety.

A Full Spectrum of Integrated Monitoring Solutions

From invoicing to inventory management, SCRAM Systems offers monitoring solutions from A to Z, helping community corrections and judicial teams supervise clients of all risk and need levels.

The SCRAM Systems Product Suite is more than just a collection of devices; it's a comprehensive, integrated ecosystem designed to foster accountability, support rehabilitation, and ultimately, create safer communities by providing the right level of supervision for every client, every time.
