Home Technology Pros Services

A Smart home system isn't just a handful of gadgets installed in your house with folder full of apps on your mobile device to control them. The Smart Home is a pairing of home technology devices that are carefully selected and seamlessly integrated together to make your home more comfortable, safe and easy to operate.

That's our goal at Home Technology Pros. Our Franchise Owners and technicians are trained experts at smoothly blending smart technologies into your daily home life.

Picture a home life where:

- 🏠 Your thermostat learns your comfort preferences and automatically adjusts your home temperature settings.
- 🏠 With the press of a single button your favorite music streams throughout the house.
- 🏠 All your smart devices are set up to run seamlessly using simple voice command
- 🏠 Update your existing audio/video equipment with newer, internet enabled control.

Our team of professionals are experienced with selling, designing, installing and supporting the latest equipment from the leading smart home technology brands.

We can configure just about any smart technology to make your home more comfortable, safe and enjoyable—inside and out.

We Install, Sell, and Support the Following Services

TV Mounting

Whatever TV you have, wherever you want it, we can make it happen. We can install pretty much every TV on the market no matter the size. Better yet, it'll be exactly where you want it, dead level and installed to last.

Why waste an entire afternoon struggling with your TV mount installation when we can do it perfectly for you in a fraction of the time?

TV Mounting Services

Home Theater

A home theater is one of the most enjoyable family luxuries you can have. While the technology itself isn't particularly expensive, installing it for optimal sound and viewing pleasure can be a real headache.

First there's the tricky process of locating an optimal location for the screen and speakers. Then there's the challenge of making it work perfectly with your home WiFi network. Then there's the issue of parental controls to consider.

We can do it all, so all you and your family have to do is sit back and enjoy the movie.

Audio Systems

Surround sound is one of the most challenging installations for the home technology enthusiast to get right.

There's a daunting array of products, sure, but even after you've made a purchase you'll need a lot of finesse to find that perfect speaker location which fills your home with crisp, rich audio.

We're specialists in audio system installation. We'll guide you through every step of the process from product choice, to installation, to network hookup, to full sound optimization.

Audio Installation Services

Smart Remote Controls

The average living room has five remote controls. That's a lot of technology to keep track of. It's also unnecessarily complicated.

Home Technology Pros' offers a remote control setup service. We've been programming universal remotes for close to twenty years and we're experts at simplifying the experience of using home technology.

Not only will you have fewer remotes in your home, you'll also be able to control your home technology with fewer button presses. We'll also give you the option to control your devices using an app on your smartphone or tablet.

We can take the unnecessary complexity out of your home technology.

Smart Remote Services

Security Cameras

Smart security cameras are one of the best ways you can keep your property and family safe.

Smart cameras are able to analyze what they see, letting you know via smartphone if anything unusual requires your attention. This makes them a powerful theft and home invasion deterrent, but they're equally effective at maintaining a close eye on your young ones, your elderly relatives and even your pets.

To help you get the most out of these amazing devices, Home Technology Pros' certified technicians will perform a complete installation for you. We'll even show you how to use them.

Security Camera Installation Services

Smart Thermostats

Old style thermostats have a temperature setting and an on/off button. Staying comfortable can be a constant struggle. If you're tired of battling with your thermostat, we can help.

Smart thermostats can analyze temperature through your whole home, fine-tuning temperature in your climate zones based on your preferences over time.

We can also hook your thermostat up to your smart home speaker, making it voice controlled.

Smart Thermostat Installation Services

Smart Doorbells

Package theft is on the rise. Up to a third of homeowners in the US report having had parcels stolen from their front door. A smart video doorbell will drastically reduce your risk of theft, and it sets you up with the additional convenience of being able to see who's at your door wherever you are.

Home Technology Pros can wire a smart video doorbell up to your existing doorbell connection, or if you prefer, we can install a battery operated unit directly to your door.

Smart Doorbell Installation Services

Smart Door Locks

You can take every security precaution in the book, but if your home isn't equipped with a solid, reliable lock, your house and its contents will always be vulnerable. While a deadbolt works wonders, what if you lose your key? And how do you keep your house secure while maintaining the convenience of opening your door to people you trust?

Smart locks solve all this. With features like touch-pad entry, remote locking and smartphone door access, smart locks are just as reliable as the strongest deadbolt but they're so much more convenient — for you, your loved ones and those you trust.

HTPros offers a full smart lock installation service. Our installations are completely secure, reliable and up to code.

Smart Door Lock Installation Services

Smart Lighting

Smart Lighting is just a cool thing to have in your home. We'll set your home up with app controlled smart-lighting. Just open your phone and dial up any kind of lighting you can imagine, from ambient mood lighting to crazy disco lights.

If you're looking for an inexpensive way to add some real pop to your home, smart

If you're looking for an inexpensive way to add some real pop to your home, smart lights are definitely going to deliver.

Smart Lighting Installation Services

IT & Network

No smart home is going to work properly if its network and connectivity equipment aren't configured correctly.

We'll resolve any connectivity issue you're dealing with, from unreliable Internet to black spots in your WiFi coverage, to devices which refuse to cooperate on your home network.

Our qualified technicians have seen it all and are skilled in resolving network problems.

Our Customer Reviews

Johnathan was my tech, this gentleman was on time, clean, professional, solid and worth a second call because of how confident I felt on his install the 1st time around. The second install was well performed also. I can't wait to call on his help again and so should you! Thanks again Home Technology Pros and Johnathan for the service.

Eric S. | San Jose, CA

Being an absolute novice with audio/visual, I was pleased with Gavin's ability to direct me toward a solution that I fully understood. I called around to several companies and did not receive the same level of service and integrity. I walked away with the exact information I needed, and now my head can stop spinning!

Christina S. | Sacramento, CA

After purchasing a "universal" TV mount from Amazon and attempting to mount our new television over our fireplace ourselves, we knew we needed help. First, the mount would not work with our new Sony TV and trying to hide the cable box was a real challenge! We called Home Technology Pros, and after a bit of a miss on the communication side, we couldn't be more happy with the way the installation went. Our technician was extremely professional and more than went out of his way to make this challenging installation happen promptly. He even worked on Saturday morning to fit our schedule!!!

Pamela A. | Elk Grove, CA

I found Home Technology Pros on Yelp. After reading so many great reviews I figured I'd give them a try. I was not disappointed and the great reviews were spot on! Herman was very professional and did a great job setting up our home theater system. He was very thorough and went above and beyond and fixed a few things that most installers would have probably ignored. I'll definitely use

them again!

KJ S. | Roseville, CA

I had a random work request for new network cable runs for my home-office and add additional security cameras. The work wasn't easy considering what they had to go through for some of these runs, but it didn't stop them from going above and beyond. Everything turned out great and they even went as far as to organize the mess of wires in the server closet and security box, not necessary but super impressed with their attitude and work ethic. Would recommend them to anyone.

Shayne S. | San Francisco, CA

HTP did a great job in designing, planning and installing our new AV system here in Davis. Their price was competitive, and they tried to meet our requirements with excellent communication skills. Home Technology Pros was a recommendation from one of our new neighbors, and we are fortunate this top quality firm was recommended to us. We, in turn, would recommend this firm to anybody with the goal of installing an excellent AV system.

Michael R. | Davis, CA
