## Our Home Security Services

### Smart Door Locks

You can take every security precaution in the book, but if your home isn't equipped with a solid, reliable lock, your house and its contents will always be vulnerable. While a deadbolt works wonders, what if you lose your key? And how do you keep your house secure while maintaining the convenience of opening your door to people you trust?

Smart locks solve all this. With features like touch-pad entry, remote locking and smartphone door access, smart locks are just as reliable as the strongest deadbolt but they're so much more convenient — for you, your loved ones and those you trust.

HTPros offers a full smart lock installation service. Our installations are completely secure, reliable and up to code.

## Security Cameras

Smart security cameras are one of the best ways you can keep your property and family safe.

Smart cameras are able to analyze what they see, letting you know via smartphone if anything unusual requires your attention. This makes them a powerful theft and home invasion deterrent, but they're equally effective at maintaining a close eye on your young ones, your elderly relatives and even your pets.

To help you get the most out of these amazing devices, Home Technology Pros' certified technicians will perform a complete installation for you. We'll even show you how to use them.

## Smart Doorbells

Package theft is on the rise. Up to a third of homeowners in the US report having had parcels stolen from their front door. A smart video doorbell will drastically reduce your risk of theft, and it sets you up with the additional convenience of being able to see who's at your door wherever you are.

Home Technology Pros can wire a smart video doorbell up to your existing doorbell connection, or if you prefer, we can install a battery operated unit directly to your door.
