

# SONOS

## Made to Gather

Sonos Beam was made for those moments. The hold-your-breath season finale. The podcast's unexpected twist. The final drive toward the end zone. The spontaneous family dance party. The countdowns. The reveals. The culminations.

These are the moments that bring us together—so they deserve to be experienced at their best. At a compact 25.6 inches, Beam provides surprisingly rich, detailed sound that won't overwhelm your space. And with Amazon Alexa built-in, turn it up without fumbling for the remote.

We're living in the golden age of content. Experience it together.

### Bring Down the Walls

Emerging from Chicago's LGBTI scene, house music has long had roots in resistance and activism. Learn how one of Sonos' Listen Better grantees, Creative Time, worked within the genre to address modern day criminal justice issues. The ambitious project incorporated a dance club, social justice workshops, and a concept album mixed by Sonos sound engineers.

### Sonos Pro Tip

**Never miss a word of snappy dialogue with Speech Enhancement.**

When playing TV audio through Beam, Playbar, or Playbase, tap the speech bubble icon on your Now Playing screen to keep dialogue front and center (no matter how loud the explosions get).

### Alexa Skill of the Week

MovieBot

After enabling MovieBot, Alexa can recommend movies or have a conversation with you about your favorite cast, directors, and more.

"Alexa, recommend a musical."

You never know how Alexa will answer until you try.

## "Alexa, what's your favorite movie?"
