

More power. More possibilities.

Meet Amp.

Amp extends the Sonos experience to your in-wall and in-ceiling speakers, bookshelf and floor-standing speakers, and yes, even outdoor speakers. Power hungry? With 125 Watts per channel, Amp supports high fidelity sound for even the most demanding speakers.

Stream everything.

Stream everything you love with the Sonos app and Apple AirPlay 2.

Amplify your TV experience.

Connect your TV to enjoy immersive stereo or surround sound for shows, movies, and video games.

Play all your music.

Connect your turntable or other audio sources to enjoy vinyl, CDs, and audio files stored on your devices.

Take the sound outside.

Amp easily powers third party outdoor speakers so you can expand your sound system to the backyard.

It gets better.

Regular software updates means Amp improves over time.

Is Amp for me?

Most Amps will be professionally installed, so if you're looking for a professional installation for your home sound system, we can help you find one below. If not, here are some questions to find out if Amp is right for you.

Do you want to incorporate any of the following into your Sonos sound system?

- | | YES | NO |
|--|-------------------------------------|--------------------------|
| <p>1 Speakers that need to be wired into an amplifier in order to play (i.e. bookshelf speakers, floor-standing stereo speakers, etc.)
<small>*Note: Some speakers have amplifiers built into them and do not need to be wired into an amplifier.</small></p> | <input checked="" type="checkbox"/> | <input type="checkbox"/> |
| <p>2 Speakers built into your walls or ceilings</p> | <input checked="" type="checkbox"/> | <input type="checkbox"/> |
| <p>3 Outdoor speakers</p> | <input checked="" type="checkbox"/> | <input type="checkbox"/> |

If you answered yes to any of the above, click below to learn more about Amp.

Smart homes and sonic architecture

Smart speakers like Sonos One and Beam have allowed people to incorporate sound into their design-focused smart homes. Amp takes it further, integrating brilliantly clear, room-filling sound into the physical walls and ceilings themselves.

"Sonic architecture is really just about actively considering how to incorporate sound into the spaces where people live and meeting them where they are, not where we think they should be."

—Tad Toulis, Sonos Vice President of Design

Find a Professional Installer

The Sonos system is designed to be easy to set up, control, and expand throughout your whole home. However, if you're looking for a more custom-built solution for your sound system that better suits the architecture of your home, you can find Professional Installers in your area via our Store Locator.

The making of Amp

The Professional Installer community played a huge role in the development of Amp. So did waffles, banana plugs, and black-painted circuit boards. Go behind the scenes to learn more about what went into the making of Amp.
