

VOLCANIX

CHEAT SHEET

WHO IS VOLCANNX?

ROOTED IN THE PAST, NURTURED IN THE PRESENT, CRAFTED FOR THE FUTURE.

At VOLCANNX, the plant, the culture, and the people are at the center of everything we do. With our state-of-the-art indoor grow, tissue culture practices, and pheno-hunting, we produce top-tier flower in exotic strains with uniquely bold flavors.

KEY SELLING POINTS

IN-DEMAND STRAINS

Strain menu showcases our impressive genetic library with 50+ cultivars and offers the most sought-after varieties, including Green Cush, Cereal Milk, Apple Fritter, Malibu Pure Kush, Shortcake, Papaya, White Tahoe, Wedding Pie, Future X, Pie Face, Jealous Bananas, and more.

EVOLVING FLOWER MENU

Pheno-hunting allows us to search out and test new cultivars so our flower menu constantly evolves — ensuring we always offer consumers the newest and most exciting strains.

AFFORDABILITY

Competitive price, premium quality, and in-demand strain selection offer consumers the most value and allow our retailers to meet the current market shift toward accessible, top-tier flower in exotic strains.

LIMITED DROPS

Our Grower's Stash series includes exclusive, small-batch strains available for a limited time only.

VOLCANNX

PRODUCT LINE

1/8th Jars of Whole Flower & Pouches of Smalls

VOLCANNX PACKAGING

-  Unique custom packaging and artwork for each staple strain
-  Includes a viewing window to give customers a peek at our flower
-  Jars include induction seal to control humidity and preserve terpenes, freshness, and structure

OUR CULTIVATION

 The VOLCANNX cultivation team collectively has over 30 years of experience in cannabis, giving them a thorough understanding of the history of this industry and the lineage of each strain we produce.

 Our tissue culture process ensures our flower expresses the traits that make each cultivar unique while accentuating premium characteristics.

 The high terpene content of our flower offers bright flavors, more intense highs, and creates a synergistic effect between the mind and body.

 We use the most advanced cultivation techniques and equipment available, such as Luxx Lighting, HGV nutrients, and Growlink quality control, to maximize trichome production and preservation — producing flower with tight buds, deep hues, and sparkling crystals.
