

World-class business solutions that inspire excellence

Delivering ERP solutions that inspire success

Moving to a cloud-based infrastructure can open your business to a new world of possibilities. As Singapore's preferred Microsoft Dynamics partner for manufacturing and service-based industries, Winspire offers customer-centric ERP solutions that are innovative and financially guaranteed with a 99% uptime. With Winspire, your data is safe and protected, flexible to scale, and always under your control.

Personalized dashboards

Winspire offers personalized dashboards that provide intelligent insights into your company's most important analytics. Having access to exclusive data gives your business fresh perspectives on how to effectively drive results.

Customer-centric focus

At Winspire, customers are our passion— and we take pride in understanding you and your business. No challenge is too big or too small for Winspire, as we are adept to creating opportunities that help transform businesses.

Extended support and urgent response

While there may not be enough hours in the workday for everything, you can rest assured that Winspire offers extended support with quick response to customer inquiries during evenings and weekends. We also run seminars and workshops during non-office hours upon request.

Delivering ERP solutions that inspire success

Microsoft Office 365

Business intelligence insights

Delivering ERP solutions that inspire success

Bring productivity to an all-time high with Dynamics 365 cloud-based solutions from Winspire.

Winspire helps you drive business with the power of the Azure cloud

Winspire leverages the power of Microsoft Dynamics 365 cloud services to give your business the most robust productivity system in your industry. With the addition of optional backup, disaster recovery, and IT health monitoring through Azure, your transition to the cloud will be easier than you could have imagined.

Disaster Recovery Setup

Winspire will design an Azure-based disaster recovery plan that is specific to your business. This includes a well-defined explanation of the processes for both backup and recovery in the event of system failure.

- Architect backup solution
- Define process for backup and recovery

\$??? user/minute
