

Best 3 Home Remodeling Trends for Your Kitchen

With the New Year approaching, many homeowners find themselves considering taking on home remodeling projects, and what better way to begin a new year than sprucing up your kitchen? For any questions or concerns about your space, make sure to consult the experts at your local home improvement store before getting a jump-start on trends and what's en-vogue for kitchen design with these few remodeling tips.

3 New & Exciting Kitchen Trends

1. Customized Tile

Personalize your backsplash by designing your own tiles, or shopping at your local home improvement store. Select a pattern or color tailored to your own specific tastes to add a customized focal point to your kitchen. Or, make your flooring the statement piece by laying down tile, creating an eye-catching focal point that will leave all your house guests begging for design tips.

2. Grey Undertones

Maintain a classic kitchen look while achieving a contemporary *je ne sais quoi* with greyed versions of vibrant and pastel paint colors. The subtlety of the greyed-out colors achieves a mellow and homey kitchen environment as opposed to the overwhelming nature of brighter paint colors.

3. Metal Detailing & Accents

A home remodeling project would not be complete without adding on-trend metal detailing. Whether it's the framework of a coffee table, a kitchen accessory or the handles on your cabinets, copper, gold and brass metals are here to stay for the foreseeable future. Rose gold is making an especially strong appearance across kitchens nationwide.
